

Russia Prepares For Strikes On Saudi Arabia After Chemical Weapon Attack Fears In Yemen Grow, Orders Heavy Bombers To Stay In Iran

By Sorcha Faal

An astonishing new **Security Council (SC)** report circulating in the Kremlin today reveals that **Russia** is in the process of preparing for military strikes upon **Saudi Arabia** [over its use of chemical and biological weapons in Yemen](#)—that is due to the [apocalyptic situation in Yemen](#) about to get much worse after [Jaysh al-Islam](#) terrorists leaving **Syria** are [now flowing there in massive numbers](#), and who in the past have [used chemical weapons against Syrian Kurds](#)—with the greatest fears of the **General Staff** being of a [“super bug” just discovered in Yemen](#) by **Médecins Sans Frontières (MSF-Doctors Without Borders)** scientists who are now warning has mutated into a [new bacterium that poses a catastrophic risk to the entire world](#)—and with **Russia’s** first action in this potential strike against **Saudi Arabia** being the ordering of [its heavy bombers in Iran](#) to stay there until further orders are received while **Moscow** builds a **US, UK** and **French** coalition to begin these attacks.

***Putin Orders Massive Strike
Against Saudi Arabia
If West Attacks Syria***

According to this report, in the hours leading up to yesterday’s **United Nation Security Council (UNSC)** meeting where **Russia** put forth a resolution condemning the [American-led “military masturbation” attack upon Syria over unproven allegations of a chemical attack](#), **President Putin** pointed out to his **Western** counterparts that the logic they were using to justify their illegal attack could, in turn, be used by **Russia** to launch strikes against **Saudi Arabia**—with the **West’s** new standard for allowing any country to attack another being best

articulated by France's UN Ambassador [Francois Delattre](#) who stated “the use of chemical weapons cannot be tolerated and must be deterred...that is essential”.

Siding with **Russia’s** position that unproven chemical weapons use accusations failed to meet **United Nations** standards for one country launching an attack on another ([Law of War](#)), this report continues, [were China and Bolivia](#)—with **Ethiopia, Kazakhstan, Equatorial Guinea and Peru** [abstaining from voting](#) because they needed more information—but with the **Western** aligned nations of the **US, UK, France, Netherlands, Sweden, Kuwait, Poland and Ivory Coast** [voting to reject](#) the **United Nations** decades long justified reasons to start wars with their, instead, creating a new paradigm allowing any nation to attack another based on nothing more than the standard of “[we believe it happened, so it’s true](#)”.

| Six years of smokescreens | |
|--|--|
| Independent evidence (ignoring US-embedded agencies HRW, SOHR, Bellingcat, etc): ALL chemical weapons claims against Syria were false | |
| Incident | independent evidence |
|  First use of sarin in Syria was by Nusra (al Qaeda) against Syrian Army (SAA). Khan al Assal attack, March 2013. | UN official Carla del Ponte says evidence 'rebels' used sarin in Aleppo (BBC 6/5/13). Nusra gang arrested in Turkey with sarin (Reuters 31/5/13). |
| East Ghouta incident Aug 2013, as UN team arrives in Damascus, jihadists claim SAA attacked civilians with CW, Aug 2013 | US intel doubted story (Hersh 2013); US scientists say rockets used "could not possibly" have come from SAA (Lloyd & Postol 2014); see all evidence (Anderson 2016) |
| First UN report identifies but does not allocate blame on CW use in Syria. | UN (2013) says 3 of the 5 CW attacks in Syria were against 'soldiers and civilians'. SAA the target. |
| Under Russian-US de-escalation deal, Syria disposes of all its CW stock | Disposal verified by USA. 'We got 100 percent of [Syria's] chemical weapons out.' (John Kerry, June 2014) |
| Repeated use of CW by jihadist groups, sometimes falsely blaming Syrian Army. | Mustard & chlorine gas used by jihadists against SAA and Kurdish groups in Aleppo and Hasaka (OPCW 2015). Jaysh al Islam admits using mustard gas (Kurdistan24 2016). |
| Khan Sheikhou n (Idlib) incident; jihadists claim SAA dropped CW on them, April 2017. Claims backed by the White House. | Ted Postol (2017) says zero evidence CW explosion came from the air, detonated on ground. OPCW gets 'sarin like substance' samples from al Qaeda linked 'White Helmets'. |
| Chlorine, Sulphur, other chemicals used & discovered in east Aleppo , 2015-2017 | Sulphur, chlorine and other raw materials from Saudi Arabia discovered in Aleppo (OPCW 2015, Newsweek 2017) |

Quickly adopting this new **United Nations** standard wanted by the **West** of “[we believe it happened, so it’s true](#)” in order to legally justify one nation attacking another, this report details, was **President Putin**—and who, during today’s **Security Council** meeting, [presented evidence that Saudi Arabia has been supplying ISIL and Nusra Front terrorists with chemical weapons and chemical ingredients for building such weapons](#)—with **Yemeni Armed Forces Spokesman Brigadier General Sharaf Qaleb Luqman**, also, having [previously documented the extensive use of chemical and biological weapons by Saudi-led forces in Yemen's Ma'rib province](#).

Even more barbaric, this report notes, **General Sharaf Qaleb Luqman**, this past October (2017), stunningly revealed that the true cause of [Yemen’s cholera outbreak that has become the worst in our world’s entire history](#)—and [who shockingly stated](#):

Poisonous gases were spread in the sky after the US, Saudi and Israeli fighter jets' direct airstrikes and they came down to the ground with the rain and penetrated and contaminated our underground waters

Therefore, it was a biological war as Saudi Arabia has already used all types of banned weapons against us.

While the **West** is manically cheering itself for its [completely failed strike on Syria](#) over unproven chemical weapon use allegations, that even the **Jaysh al-Islam** terrorists ([who concocted this “fake news” story at the urging of their British secret services handlers](#)) are now [“calling a farce”](#), this report continues, completely being ignored by these **Western** warmongers is what **Saudi Arabia** is doing in **Yemen**—and whose description as a “war” by the **US-led** mainstream propaganda media is as grossly obscene as it is inaccurate, as it’s true propose is the total extermination of that nation’s millions of **Islamic Shiite** peoples in what has become [one of the largest genocides in human history](#). As the [Western-sponsored genocide in Yemen](#) has now grown to such evil and demonic depths that **UN Humanitarian Chief Mark Lowcock**, after recently visiting there, shockingly intoned that it [“looks like the apocalypse”](#) while warning that [“unless the situation changes, we’re going to have the world’s worst humanitarian disaster for 50 years”](#), this report details, **Saudi Arabia’s** total blockade on allowing food into **Yemen** has caused [the starvation deaths of at least 150,000 in the last year alone](#)—but whose real and verifiable deaths the **American** people aren’t allowed to know about in order to weigh against the supposed, [but never found](#), 40 or so **Syrians** supposedly killed by chemicals last week to determine which nation, in fact, they should be attacking for crimes against humanity.

To how **Saudi Arabia** has been able to keep its massive genocidal crimes against humanity in **Yemen** hidden from the **American** people, this report explains, is due to their conducting [one of the largest public relations campaigns of outright deception in US history costing a staggering \\$1.5 billion](#)—and whose efforts have led to the buying off of the entire **US** mainstream propaganda media establishment, as well as top **US** politicians, [led by Qorvis](#)

[MSLGROUP](#) and [Booz Allen Hamilton](#)—with the latter being a **US** management consultancy with [long-established links to the “Deep State”](#)— and who, also, was [involved in the illegal SWIFT and PRISM mass surveillance programmes revealed by Edward Snowden](#).

To what has placed **Saudi Arabia's** genocidal actions in **Yemen** at the forefront of **Russian** military and political consideration as a vital national security threat to the entire **Federation**, this report grimly notes, are the grave reports being issued by **Doctors Without Borders** scientists about what is now happening in **Yemen** due to the **Saudi's** unrestrained biological and chemical use—with these scientists warning that **this conflict is taking on aspects of warfare once found only in history books**, when the real toll of a military campaign is not the immediate damage from weapons, but **the long-term and far greater impact of disease that spread in the chaos of armed conflict**.

First noticed by **US** troops in **Iraq** and **Afghanistan**, this report explains, the **Americans**, [by 2009](#), realized that a never before known bacterium was circulating throughout the **Middle East** that no antibiotic could cure—known as a “**superbug**”—and that due to the **Saudi's** use of biological and chemical weapons in **Yemen**, has [now mutated](#) into what is being called the “**Acinetobacter baumannii**”—and whose deadly virulence is so feared, [even the US](#) has labeled it as a “**national security threat**”.

For anyone believing that the already apocalyptic situation in **Yemen**, due to the **Saudis** being allowed by their **Western** backers to use chemical and biological weapons against that nations innocent peoples, couldn't possibly get any worse, this report concludes, they'd be gravely mistaken—as the **British**-led and controlled **Jaysh al-Islam** terrorists from **Syria** ([who primarily attack civilian targets via kidnappings and bombings, and launches rockets into Israel](#)) are now being deployed to **Yemen** via **Saudi Arabia**—with the **Saudi's** not-so-secret reason for doing so being [these Jaysh al-Islam terrorists having freely admitted that they used chemical weapons in a mainly Kurdish populated area in the city of Aleppo, northern Syria in April 2016](#)—and that under the new **United Nations** war standard just imposed on the world by the **Americans**, now makes **Saudi Arabia** a legitimate and legal “target for destruction” by **Russian** military forces—and is why **President Putin** has just instructed the **General Staff** to begin talks with the **US**, **UK** and **France** in order to build a coalition to strike these “chemical weapon using animals” as soon as possible—and that, of course, none of these **Western** powers could possibly object to, as to decide anything otherwise would expose them on the world stage as being liars and hypocrites.

President Putin remains confident that the US, UK and France will join Russian coalition to bomb Saudi Arabia until it quits using chemical and biological weapons in Yemen
