

# Europe Prepares For War As New Signs Point To Summer-2019 Takedown Of Hillary Clinton By President Trump

By Sorcha Faal

A stunning new **Foreign Intelligence Service (SVR)** report circulating in the **Kremlin** today states that yesterday's signing by **German Chancellor Angela Merkel** and **French President Emmanuel Macron** [of a treaty to begin the creation of European Union Army to protect their leftist-socialist regimes now threatened by populist-nationalists](#), is due to their growing fears of how their peoples will respond once **President Donald Trump** begins arresting **Hillary Clinton** and her "**Deep State**" allies—an action **SVR** intelligence analysts believe will begin occurring before the **Summer** of this year ends—as evidenced by the [mysterious delay by Trump's Justice Department of sentencing until July-2019 of Carl Ferrer](#)—the key witness against [Hillary Clinton and Democrat Party mega-donor James Larkin](#) who, along with his also under indictment partner [Michael Lacey](#), ran the notorious, but [now FBI seized](#), sex trafficking website [Backpage](#)—whose illegal profits were laundered through **Clinton's** law firm [Perkins Coie](#), who, in turn, [used these monies to pay the British spy company that created the made up Trump-Russia Dossier](#)—except for the [\\$2.9 million discovered in a once secret Backpage-Perkins Coie bank account a US Federal Court just ordered seized on 15 January 2019](#).

According to this report, during the course of the **2016 US Presidential Election**, the **SVR** extensively documented how **Hillary Clinton** and the **Obama Regime** conspired in a plot to destroy **Donald Trump**—whose most basic outlines involved **Clinton** funneling millions-of-dollars to her **Perkins Coie** law firm—that **Perkins Coie** then funneled to the **Washington D.C.** political opposition firm **Fusion GPS**—with **Fusion GPS** then funneling these monies to former **British MI6** agent **Christopher Steele** to create the made up **Trump-Russia Dossier**—and whose [sole purpose of Steele testified under oath in a London court was to give Clinton a means to contest her election loss to Trump.](#)

Once former **MI6** agent **Christopher Steele** finished completing **Hillary Clinton's** made up **Trump-Russia Dossier**, this report details, it was given to **Perkins Coie** attorney [Michael Sussmann](#)—who was a former **US Department of Justice** attorney and close friend of top **FBI** attorney [James Baker](#), who is [now under criminal investigation for his crimes against Trump](#)—and whose [sordid attempt to bring down Trump reveals:](#)

When at first you don't succeed, try, try again. That's what Hillary Clinton's machine did in 2016, eventually getting the FBI to bite on an uncorroborated narrative that Donald Trump and Russia were trying to hijack the presidential election. Between July and October 2016, Clinton-connected lawyers, emissaries and apologists made more than a half-dozen overtures to U.S. officials, each tapping a political connection to get suspect evidence into FBI counterintelligence agents' hands.

In each situation, the overture was uninvited. And as the election drew closer, the point of contact moved higher up the FBI chain. It was a **"classic case of information saturation"** designed to inject political opposition research into a counterintelligence machinery that should have suspected a political dirty trick was underway.

**Michael Sussmann** from the **Perkins Coie** law firm, which represented the **Clinton campaign and Democratic Party**, came to personally deliver **FBI chief attorney James Baker** dirt on Trump.

Sussmann's firm paid Glenn Simpson's Fusion GPS opposition-research firm to hire British intelligence operative Christopher Steele to create the now-infamous dossier suggesting Trump and Moscow colluded during the 2016 election. By the time Sussmann reached out, Steele's dossier already was inside the FBI. Sussmann augmented it with cyber evidence that he claimed showed a further connection between the GOP campaign and Russian President Vladimir Putin. Some was put on a thumb drive, according to Baker. Baker's detailed account illustrates how a political connection — Sussmann and Baker knew each other — was leveraged to get anti-Trump research to FBI leaders.

By late 2017, this report continues, **President Trump** and his loyal forces began to unravel this vast **Hillary Clinton** plot against him—and that led, in **October-2017**, to the **Campaign Legal Center (CLC)** [filing a complaint with the](#)

[Federal Election Commission detailing the violations Clinton and her coup plotters committed](#)—but that the **Federal Election Commission** has [mysteriously yet to rule on for the past 15 months](#).

As to why the **Federal Election Commission** controlled by loyal **Trump** operatives has yet to rule on this open-and-shut case, as no details to this coup plot crime are in dispute, and are backed by thousands of documents, witness testimonies and grand jury hearings, this report explains, **SVR** intelligence analysts previously determined was due to its having become a **US** federal criminal investigation—that was confirmed in late [March-2018 when it was announced that US Attorney John Huber would be investigating these crimes](#)—and whose very first action, barely a fortnight after he began his investigation, occurred on [6 April 2018 when he ordered the FBI to seize the sex trafficking website Backpage and arrest all of its top officials](#).

Important to know about the sex trafficking website **Backpage**, this report notes, was that it was created and owned by [James Larkin](#) and his partner [Michael Lacey](#)—both of whom founded the **American** media empire [Village Voice Media](#)—that they [suddenly sold in 2012, choosing to keep for themselves the Backpage website that brought in one-seventh of their total revenue](#)—and after which saw [Larkin becoming a mega-donor to Hillary Clinton and the Democrat Party](#)—but who, along with his partner **Lacey** (this editor-publisher duo were called "**Lacey'n'Larkin**"), were blindsided when their **CEO Carl Ferrer** turned State's Evidence against them.

In one of the most bizarre displays of "**justice**" seen in modern **American** history as it regards his case, this report further details, once **US Attorney Huber** seized **Backpage** and jailed without bail both **James Larkin** and **Michael Lacey**—he then had [Carl Ferrer brought to 3 different States to plead](#)

guilty to local charges, the combined total of which will see him sentenced to only 5-years of prison, of which he'll serve about a third of—his then being immediately released on \$1 million bail—and his sentencing date continually pushed back, to where it's now scheduled for July-2019 “in the interest of justice”—none of whose actions were explainable until a week ago, on 15 January 2019, when a little noticed order was published by the United States District Court for the District of Arizona condemning for seizure by the US government of millions-of-dollars from once secret bank accounts under various false front company names belonging to James Larkin and Michael Lacey—the most notable of them being the secret account they had with Hillary Clinton’s law firm Perkins Coie who paid former MI6 spy Christopher Steele to make up the Trump-Russia Dossier.

With their knowing that the coming arrest of **Hillary Clinton** and her coup plotting criminal associates will spell their own doom, too, this report concludes, the leftist **US** mainstream propaganda media establishment have now gone so far as to employ Orwellian “Facecrime” tactics against President Trump—a concept in which one’s facial expressions, known to be a reflection of one’s thoughts, can be a violation of the law if those expressions are interpreted as subversive or disapproving of the ruling regime—and was put of full and disgusting display this past week when high school boy children were threatened with death because these leftist media overlords determined they looked at a native **American** man the wrong way—a native **American** man, mind you, that was proclaimed by the leftist media to be a **Vietnam War** veteran hero—but whose truth of shows him having never served in this war, even though he illegally raised money for himself claiming he did, and whose actual military service showed him being a drunk who repeatedly went AWOL—thus leaving it no wonder why Trump has just told his Press Secretary Sarah Sanders not to bother with press briefings anymore, as these leftists wouldn’t know the truth if it hit them in their heads.
