

# Putin Unleashes Fearsome Stealth Fighters As Nightmare Syrian War Clock Ticks Down To Zero

By Sorcha Faal

A gravely worded new **Ministry of Defense (MoD)** report circulating in the Kremlin today states that **President Putin** has authorized the immediate deployment to Syria of at least two fearsome **Su-57 PAK-FA “Nuclear Strike” Stealth Fighters** in response to the **United States** refusal to heed **Russia’s warning to leave this region**—and with the **Americans** not only refusing to leave **Syria**, but their then, after receiving this warning, discovered to be evacuating Islamic State (ISIS/IS/Daesh) commanders from their prison cells by helicopter then flying them to the **Eastern Ghouta** (suburb of **Damascus** under terrorist control) combat zone where less than 24 hours ago, they unleashed a massive shelling attack against the Russian Reconciliation Center.

Feared Russian Su-57 PAK-FA “Nuclear Strike” Stealth Fighters (top two aircraft) arrive in Syria on 22 February 2018

According to this report, as the **Syrian “war clock”** clicks down to zero, after which this catastrophe will take on a global dimension leading to a direct Russian-US conflict, the **Americans** last gasp effort to prolong this needless bloodshed showed them earlier this week provoking their terrorist factions in **Eastern Ghouta** to begin shelling the innocent civilian population of Damascus—after which these **US-backed** terrorists refused all Russian efforts to end this violence, and who then sealed their borders preventing the civilians captured there from being able to leave.

To what the **Americans** intended by their shameful terrorist actions in **Eastern Ghouta**, this report explains, was to create an international **Cause Célèbre**—a controversial issue that attracts a great deal of public attention—in response to **Syrian** and **Russian** forces moving in to eliminate these terrorists before they could cause further loss of innocent life.

Following all normal and established war doctrines once these **US-backed** terrorists refused all efforts for peace, this report details, **Russian** air forces began a non-stop obliteration campaign in **Eastern Ghouta** to destroy all of these terrorists' headquarters, arm depots and fighters—after which this area will be retaken by the **Syrian Arab Army's (SAA) 7<sup>th</sup> Armored Division** and elite **4<sup>th</sup> Division Tiger Force**.

As predictable as the Sun rising every morning in the East, this report continues, once **Russian** and **Syrian** military forces began to eliminate the terrorist threat in **Eastern Ghouta**, the **Americans** got their desired **Cause**

**Célèbre** with the mainstream **Western** propaganda press churning out distorted headlines such as: **U.N. Pleads For Truce To Avert 'Massacre' As Strikes Hit Syria's Ghouta For Fifth Day—Merkel Calls For End To 'Massacre' In Eastern Ghouta Ahead Of UN Vote On Possible Ceasefire—Latest Butchery In The Damascus Suburb Of Eastern Ghouta By Assad Forces Shames The Isolationist United Kingdom**—but with **Foreign Minister Sergey Lavrov** correctly pointing out what the true goal of the **United States** is by his stating:

*The **Al-Nusra Front** [currently known as **Jabhat Fateh Al-Sham** and formerly as **Al-Qaeda**] and those who interact with it have firmly rejected the proposal and continue to shell **Damascus** from their positions, using the civilian population of **Eastern Ghouta** as a human shield.*

*The authors of the resolution on humanitarian issues in **Syria**, which is to be discussed at the **United Nations Security Council** meeting on Thursday evening, wants to shift the focus from the peace process to blaming the **Syrian** government in order to promote 'plan B' namely overthrowing the regime in violation of **UN Resolution 2257**—and again want to put the blame on **Damascus** and provide cover for militant groups.*

**" .. it is now well known that both Al Qaeda and ISIS were created, funded, trained and armed by the CIA and other US security and military agencies themselves, in order to stir up violence that could then be used as excuses to intervene with military force towards covert political and financial ends. All according to objective international analysts, coinciding with highly credible sources within the US establishment itself."**

**- Jens Jerndal, spokesman for the Swedish political party Unity (Enhet), 27 May 2015**

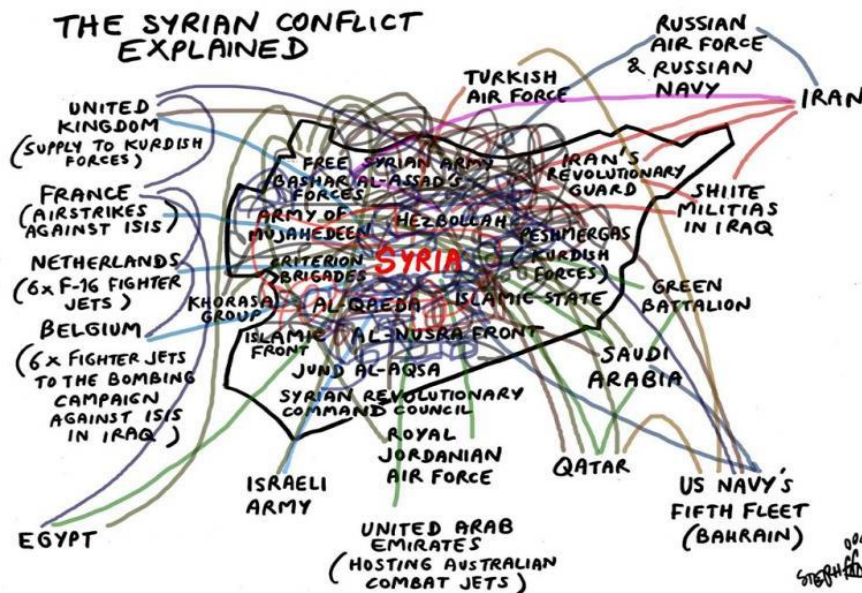

While the **Western** peoples, most particularly the **Americans**, are having their minds filled propaganda nonsense, though, this report notes, the true gravity of what's occurring now in **Syria** is not being told to them—and as, perhaps, best explained recently by **Middle East** expert **Ghassan Charbel**, and who wrote:

*Syria's story is different and unique. Never before have all these flags, interests, dangers, armies, militias, internal divisions and regional and international clashes come together on its territories.*

From the South to Idlib to Hmeimem to Afrin, Syria is like a powder keg.

It is at the heart of a complex and vast geo-strategic conflict that is impossible to resolve with force and where losses and rewards will be difficult to predict.

This is all unprecedented.

With **Syria** now becoming a black hole of Cold War entanglements whose chaos on the ground is providing opportunities for **Russians** and **Americans** to come to blows, this report continues, the **US** has further provoked **Russia** this past week by sending its warships into the Black Sea (comparable to **Russia** sailing its warships along the **US** coast)—with that at least one **US** official characterizing this grave war move as part of a desensitization effort, aimed at forcing **Russia** to grow accustomed to an **American** military presence in the region—that whether intentionally or not, shows that NATO and Russia have entered into the early stages of a new **Cold War**.

With this new **Cold War** between **Russia** and the **United States** therefore now being a reality, this report concludes, the “*ignition points*”, like **Syria** and the **Black Sea**, that would cause a **Hot War** are now smoldering—with any miscalculation, by either side, leading to a nuclear confrontation—but whose basics the Americans have got all wrong—and that caused **Senior Diplomat Sergey Kislyak** to warn the world last week at the **Munich Security Conference** that “we get the sense that our American colleagues are looking at low-yield nuclear weapons more as a war fighting weapon than classical deterrence”—and should that be true, the consequences of would, of course, lead **Russia** to defend itself by launching its nuclear armed **ICBM's** directly into the **United States**.

Russia has never stopped making preparations for nuclear war and has built thousands of bomb shelters to protect its citizens—the United States has none to protect its people and tells them only to “go inside” when nuclear war begins.
