

# Covid19 And The Global Health Crisis 2021-2025. Why The 12<sup>th</sup> Malaysia Plan Must Provide A New Revolutionary Healthcare Policy.

By Matthias Chang – Future Fast-Forward

## Looking Back: March, 2020 - January, 2021, A Summary

- The King and the Prime Minister **performed exceedingly well** in overcoming the initial shock and awe following the announcement of the “Global Covid19 Pandemic” by WHO in 2020.
- An **unprecedented crisis**, impacting the entire world, the King and the Prime Minister **must be applauded** for their leadership in controlling the devastation to the economy and protecting the health of the entire nation.
- The **security and stability of the nation was maintained**, in spite of the insidious and power crazy politicians within the Opposition ranks plotting relentlessly to seize power every week, for an entire year. They have retreated somewhat, but are waiting for the time to **execute the bloody coup**.
- Although, the political leadership led by the Prime Minister had to focus on the micro-dynamics of the crisis as **the** priority and rightly so, our Prime Minister was **let-down and misadvised** (an understatement) by the various stakeholders within and without the government, in preparing the country post 2021.
- The opportunist hacks of all stripes and across the entire political divide **were and are still concentrating on the 15<sup>th</sup> General Elections** to be held in 2023.
- **Intellectual bankruptcy was rampant** in all the professions (other than the self-sacrificing and brave front-liners) who were directly or indirectly concerned with the Covid19 pandemic.
- Notwithstanding that the “virus pandemic” was made known to the world in 2019 by the World Economic Forum and the Bill and Melinda Gates Foundation by their simulations and models which were organised and conducted for such eventualities, with scientists as far back as early 2000s **already planning for such pandemics**, supported by the global pharmaceutical giants (forecasting \$Multi-trillion profits) **the global common and the general public was totally in the dark**.

## The Stark Reality

**The daily concerns exercising my mind is not to convince all and sundry about what I am about to disclose, but to place on record and to inform the sceptical politicians surrounding the leadership to take heed, formulate an action plan to secure our nation, when there is still time.**

I was fortunate that the fourth Prime Minister, Tun Dr. Mahathir Mohamad, was a willing listener, up to and until 2018. There is so much a Political Secretary can do - offer advice, be a Devil's Advocate, provide a different perspective, be a Contrarian, but ultimately the decision rest with the leadership and all the kudos that goes with the victories. So, it is not easy to speak truth to power. I once told Tun, when he was the 4<sup>th</sup> Prime Minister, to the horror and fear of my then colleague (the Press Secretary for Chinese Affairs) that if any of my advice, strategies etc. were wrong, I would fall on my sword, take the blame so that he need not terminate my services. For the "buck stops at my desk, not his!

For the rest of my arm-chair critics, do as you wish. To my friends, fact check, research and research so as to equip yourself and your family to confront the horrendous reality unfolding right before your eyes and will surely engulf all of us for the next ten years. Maybe more!

We should do everyone a favour, stop blaring the cliché – "There will be a New Normal"!

## **The Forgotten Hidden Agenda**

I will only entertain queries if the reader "Fact Check", research and connect the dots and cites the sources as I have done.

- **Welcome Trust** (funded by Henry Wellcome) and the **Galton Institute** have a long history with the **UK Eugenics Movement**. Galton Institute is formerly known as the **UK Eugenics Society** – promoters of racial science - the improvement of racial stock by the depopulation in South America, Africa, South Asia (India) and South-East Asia.
- The **Edward Jenner Institute** (vaccine research) established in 1995, was supported by the UK government and big pharma, GlaxoSmithKline (founded by Mr Henry Wellcome)) and in 2005 was relocated to Oxford.
- **Adrian Hill** and **Sarah Gilbert** (co-developers of the Oxford AstraZeneca vaccine have close ties with the abovementioned organisations.
- The Jenner Institute is now sponsored by the **Oxford University** and the **Pirbright Institute** (which I had exposed at the outset of the pandemic in 2020) formerly known as the **Institute of Animal Health**. So, the Jenner and Pirbright Institutes are well placed and funded for developing vaccines for human and animals. They also dominate UK's vaccine research and have conducted clinical trials etc. for the global pharmaceutical companies.
- Fact check and research on the **British Medical Journal** investigations on the ineffective experimental tuberculosis vaccine in South Africa, developed jointly by Jenner Institute and **Emergent Biosolutions**.
- Fact Check also the **UK Vaccine Network** backed by the Wellcome Trust and GlaxoSmith Kline and the EU's Vaccine Network, **MultiMalVax**.
- Jenner Institute has two offshoots - (1) **Jenner Vaccine Foundation** (funded by the WellcomeTrust Strategic Awards) and (2) **Vaccitach**, established by the commercial arm of the Oxford University, **Oxford**

**Science Innovations**, which owns 46% of Vaccitech, while Adrian Hill and Sarah Gilbert have 10% stake in the company. Publicly, the AstraZeneca vaccine is a joint effort between AstraZeneca and Oxford University but, Vaccitech is a key player because the technology is owned by Adrian Hill and Sarah Gilbert of Vaccitech.

- Behind this corporate web, is **Braavas Capital**, a **venture capital firm** founded by **Andrew Crawford Blunt**, global head of Deutsche Bank's Equity Trading. To raise further funds, approximately £600 million, Oxford Science Innovations solicited financial aid from Wellcome Trust and Google Ventures as well from Chinese **Fosun Pharma** and **Sequoia Capital**.

The above is but a microscopic view of one aspect of the global vaccine Network! Connect the dots, come to your own conclusions. Is it pure coincidence that two names always emerge at the centre of the web? You decide. Research more on the Eugenics Agenda.

I have just given you the basic facts to spur you on!

### The Propaganda For The Future Scenarios

"Fact Check", peel the onion, dig deep and follow up from my sources!

- Prior to Covid19, the Gates Foundation was funding research to "develop a universal flu vaccine". **STAT News** reported, Bill Gates was interested **"to design a flu vaccine that would protect broadly against the strains of flu that infect people every winter and those in nature that could emerge to trigger a disruptive and deadly pandemic."**
- Why the urgency to push and push for the current vaccines? **NBC** interviewed Adrian Hill, of the abovementioned fame, on **December, 2020** and he was quoted as saying, **"to wait for the end of the trial would be the middle of next year (i.e. 2021). That's too late. This vaccine is effective, available at large scale and easily deployed."**
- **BBC** reported on December 13<sup>th</sup> 2020, from Sarah Gilbert that the chances of vaccine roll out are **"pretty high"**.
- **Lancet**, the highly regarded journal told **CNBC**, **"The Oxford AstraZeneca vaccine is the vaccine right now that is going to be able to immunize the planet more effectively, more rapidly than any other vaccine we have... is a "vaccine that can get to lower middle-income countries."** **CNBC** also quoted Andrew Baum, global head of healthcare for **Citi Group**, **"the Oxford-AstraZeneca vaccine is really the only vaccine that is going to suppress or even eradicate SARS-CoV-2, the virus that causes COVID-19, in the many millions of individuals in the developing world."**
- Post the current "pandemic" it was reported by **Sky News** that the end of the Covid19 crisis **"will be based on the views of a range of unspecified independent bodies."**
- The future has been described by John Bell, the Oxford Medical professor to **NBC News**, **"I suspect we may need to have relatively regular vaccinations against coronaviruses going into the future,"**

- **John Bell** elaborated further to **The Week** that, “should there prove to be a market for regular vaccinations against coronavirus in the future, there is some money to be made.”
- **Pascal Soriot**, the CEO of AstraZeneca, told **Bloomberg** that AstraZeneca stood to make a “reasonable profit” post the pandemic and COVID-19 deemed a seasonal illness requiring regular vaccinations.
- **Vaccitech’s CEO, Bill Enright**, stated that investors would receive a “big chunk of the royalties from a successful vaccine as well as ‘milestone’ payments” if and when the pandemic is declared over.
- **Dr. Fauci** has echoed the same sentiments for annual shots in the future.
- **Charles Chiu**, professor of infectious disease at the University of California was reported by **Salon** as saying, “This may end up being a vaccine that’s not a one-time thing or even a two-time thing. It may end up being what we call either a seasonal vaccine or a vaccine that needs to be administered every couple of years.”
- From **Moderna**, we have the following forecast given to **Forbes**, “the duration of neutralizing antibodies from the Moderna vaccine will be relatively short, potentially less than a year.”
- Finally, from **Pfizer’s** own statement, “we don’t know how the virus will change, and we also don’t know how durable the protective effect of any vaccination will be” adding that its vaccine would be suitable “for repeated administration as booster shots” in the event that the vaccine only induces an immune response for a few months.
- And from the horse’s mouth, the developer of the Pfizer vaccine - **Ugur Sashin of BionNTech** said, “The virus will stay with us for the next 10 years. We need to get used to the fact there’ll be more outbreaks. If the virus becomes more efficient...we might need a higher uptake of the vaccine for life to return to normal.”

Note his choice of words, if the vaccine becomes “more efficient”!

The next disclosure would be so sickening that if it was not stated in black and white, no one would believe that these scientists are only motivated by money, and science is but a means to feed their lust for money.

In June, 2020, **Adrian Hill** was reported by **Washington Post** as stating that he wanted the Covid19 virus to continue ravaging the innocents. He said,

“We’re in the bizarre position of wanting COVID to stay, at least for a little while. But cases are declining.” And that his team is in “a race against the virus disappearing.”

That criminal bastard wants Covid19 to continue as long as possible!

Need I say more? There is so much to reveal and expose but we have a sordid state of affairs that Malaysians are totally blur as to the real agenda of the abovementioned big pharmaceutical companies and the global Deep State!

## Conclusions

I have quoted enough evidence - admissions and blatant disregard of the well-being of the global common. While our leadership with impeccable courage and steadfastness ARE STRIVING TO SAVE OUR LIVES, the scientists employed by the world's governments and big pharmaceutical companies have a different world view and agenda.

Please do your duty. Help our leaders to know the truth. They are overwhelmed by the crisis and may not have the time or the best advice to move forward beyond the short term.

**The scientists wants the Virus to continue even for the next ten years, to enable them and their companies to earn obscene profits at our expense!**

As a former political secretary to a Prime Minister, I know how the machinery of a government works.

Our Prime Minister and our King deserve better support and loyalty.

Now, do your duty or forever stay silent and be damned!
