

# Why are we Vaccinating People on the Brink of Death?

By Luke Yamaguchi – Globalresearch.ca

In mid-January 2021, Bloomberg published an article titled [Norway Warns of Vaccination Risks for Sick Patients Over 80](#). According to the article, Norway warned that Covid vaccines may be too risky for the very old and terminally ill. Norwegian officials said 23 people had died in their country a short time after receiving the first dose of the Covid vaccine. Of those deaths, 13 have been autopsied, with the results suggesting that common side effects may have contributed to severe reactions in frail, elderly people, said the Norwegian Medicines Agency.

***“For those with the most severe frailty, even relatively mild vaccine side effects can have serious consequences... For those who have a very short remaining life span anyway, the benefit of the vaccine may be marginal or irrelevant.” – Norwegian Institute of Public Health***

In clinical studies of Pfizer’s Covid vaccine, adverse reactions in participants included: pain at the injection site (84%); fatigue (63%); headache (55%); muscle pain (38%); chills (32%); joint pain (24%); fever (14%); and injection site swelling (11%).<sup>[1]</sup>

Clinical studies of Moderna’s Covid vaccine revealed an even higher frequency of adverse reactions in participants including: pain at the injection site (92%); fatigue (70%); headache (65%); muscle pain (62%); joint pain (46%); chills (45%); nausea/vomiting (23%); fever (16%); and swelling at the injection site (15%).<sup>[2]</sup>

***Given the high frequency of adverse reactions from Covid vaccines, why are we vaccinating people on hospice who are near the end of their life? Hospice and comfort care are for people who are in the final stages of an incurable illness. The aim is to ensure they are comfortable. When someone enters hospice care they generally have fewer than six months to live and have decided to stop treatments to prolong their life.***

“We have now repeated our existing advice not to give the vaccine to terminally ill patients” – Norwegian Medicines Agency<sup>[3]</sup>

For some reason, this advice does not seem to be standard of care in the United States of America. ***According to reports submitted to the Vaccine Adverse Events Reporting System (VAERS) many people on hospice have been given a Covid vaccine, only to die very soon thereafter. What follows is a compilation of VAERS reports in which terminally ill patients received a Covid vaccine, and then died within seven days of vaccination.***

**Deaths Same Day as Vaccination**

**VAERS ID: 1077079**

Age: 77                      Hospice: Yes  
Sex: Female                Vaccinated: 3/5/21  
Location: California      Date died: 3/5/21

Write-up: Patient was under hospice care. She received Pfizer's Covid vaccine on March 5 and was alert and oriented with no signs or symptoms of sickness prior to immunization. About one hour after vaccine administration, patient was reported deceased on March 5, 2021.

---

**VAERS ID: 956225**

Age: 82                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/16/21  
Location: California      Date died: 1/16/21

Write-up: Patient was on hospice. He received Pfizer's Covid vaccine on January 16, 2021. He was monitored for thirty minutes after injection and was stable with no reaction. Approximately one hour post-injection, patient was unresponsive and passed away on January 16, 2021.

---

**VAERS ID: 960552**

Age: 78                      Hospice: Yes  
Sex: Female                Vaccinated: 1/18/21  
Location: Unknown        Date died: 1/18/21

Write-up: Patient was on hospice, and was rapidly deteriorating, and had not eaten or consumed liquids for a few days. She received Pfizer's Covid vaccine on January 18, and about thirty minutes later passed away on January 18, 2021.

---

**VAERS ID: 1003106**

Age: 92                      Hospice: Yes  
Sex: Female                Vaccinated: 2/4/21  
Location: California      Date died: 2/4/21

Write-up: Resident was on hospice and received Pfizer's Covid vaccine at 9:12 a.m. on February 4, 2021. Within twenty minutes of receiving the vaccine she

was unresponsive, pupils were fixed at 9:45 a.m., no vital signs noted. Hospice came out and reported her time of death at 10:21 a.m. on February 4, 2021.

---

**[VAERS ID: 921880](#)**

Age: 96                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/2/21  
Location: Virginia        Date died: 1/2/21

Write-up: The resident had been on hospice care for a little while. He received Pfizer's Covid vaccine on January 2, 2021. The resident was found deceased a little less than 12 hours following Covid vaccination. No one noticed any side effects from vaccine after it was given.

---

**[VAERS ID: 940855](#)**

Age: 79                      Hospice: Yes  
Sex: Female                Vaccinated: 1/12/21  
Location: Arkansas        Date died: 1/12/21

Write-up: Resident on hospice care due to end of life. She received Moderna's Covid vaccine on January 12, 2021. She expired at approximately 7:30 p.m. on January 12, 2021.

---

**[VAERS ID: 959729](#)**

Age: 82                      Hospice: Yes  
Sex: Male                    Vaccinated: 12/30/21  
Location: Maryland        Date died: 12/30/21

Write-up: Patient was on hospice. He received Pfizer's Covid vaccine on December 30, 2021. Per nursing staff, patient died within 24 hours of receiving the vaccine.

---

**[VAERS ID: 971736](#)**

Age: 88                      Hospice: Eligible  
Sex: Male                    Vaccinated: 1/21/21  
Location: Iowa              Date died: 1/21/21

Write-up: Resident was previously on hospice before admitting to our facility and planned to be readmitted to hospice upon discharge. He received Pfizer's Covid vaccine on January 21. Resident vomited thirty minutes after vaccine administration. Approximately 9 hours later had stroke-like symptoms and passed away on January 21, 2021.

---

**[VAERS ID: 993998](#)**

Age: 92                      Hospice: Yes  
Sex: Female                Vaccinated: 1/13/21  
Location: California      Date died: 1/13/21

Write-up: Admitted to hospice prior to vaccination. Prior to receiving the vaccine, the patient was reported as being "fine". She received Pfizer's Covid vaccine at 11:00 a.m. on January 13. The patient coughed maybe 5 or 6 times and then dropped her head. Resuscitation was not performed as patient had a do not resuscitate order. The patient passed away at 1:05 p.m. on January 13, 2021.

---

**[VAERS ID: 915920](#)**

Age: 96                      Hospice: Eligible  
Sex: Female                Vaccinated: 12/28/20  
Location: Ohio             Date died: 12/28/20

Write-up: Resident was referred to hospice. She received Pfizer's Covid vaccine in the morning and expired that afternoon on December 28, 2020.

---

**[VAERS ID: 956966](#)**

Age: 86                      Hospice: Yes  
Sex: Male                    Vaccinated: 12/25/20  
Location: Unknown        Date died: 12/25/20

Write-up: ALS patient on hospice with ongoing history of aspiration. He received Moderna's Covid vaccine on December 25, 2020. Patient developed increase in secretions, hypoxemia, and temperature. He passed away on December 25, 2020.

---

**[VAERS ID: 914961](#)**

Age: 88                      Hospice: Unknown  
Sex: Female                Vaccinated: 12/30/20  
Location: Kentucky      Date died: 12/30/20

Write-up: Per nursing home staff, they did not expect patient to make it many more days. She was unresponsive in room when shot was given. She passed away within an hour to hour and half of receiving Pfizer's Covid vaccine on December 30, 2020.

### **Deaths One Day After Vaccination**

#### **[VAERS ID: 943442](#)**

Age: 68                      Hospice: Yes  
Sex: Male                  Vaccinated: 12/30/20  
Location: Georgia        Date died: 12/31/20

Write-up: Patient was on hospice. He received Pfizer's Covid vaccine on December 30, 2020. Staff reported that he expired under suspicious circumstances after receiving the vaccine. He was not expected to pass this soon, but died on December 31, 2020.

---

#### **[VAERS ID: 977426](#)**

Age: 70                      Hospice: Yes  
Sex: Male                  Vaccinated: 1/20/21  
Location: Georgia        Date died: 1/21/21

Write-up: Patient was under hospice care. He received Moderna's Covid vaccine at 4:00 p.m. on January 20, 2021. He then went home with his daughter whom he lives with. He ate dinner with her and read until 8:00 p.m. when he went to his room. She found him in his room at 9:00 p.m. unresponsive with seizures. Hospice was alerted and recommended oral valium. He continued to be unresponsive and expired the following day at 7:30 p.m. on January 21, 2021.

---

#### **[VAERS ID: 941607](#)**

Age: 83                      Hospice: Yes  
Sex: Female                Vaccinated: 1/12/21  
Location: Indiana        Date died: 1/13/21

Write-up: Patient was on hospice. She received Moderna's Covid vaccine on January 12, 2021. The next morning, she woke up as normal and during her morning shower had a bowel movement, went limp and was non-responsive. She passed away at 7:45 a.m. on January 13, 2021.

---

**[VAERS ID: 996105](#)**

Age: 95                      Hospice: Yes  
Sex: Female                Vaccinated: 1/23/21  
Location: California      Date died: 1/24/21

Write-up: Patient was on hospice. She was at her baseline before receiving Pfizer's Covid vaccine on January 23, 2021. She passed away at noon on January 24, 2021.

---

**[VAERS ID: 1052738](#)**

Age: 95                      Hospice: Yes  
Sex: Male                    Vaccinated: 2/5/21  
Location: Virginia        Date died: 2/6/21

Write-up: He received Moderna's Covid vaccine on February 5, 2021. The next day he was shaking and his mouth was open shaking, and he had a fever of 105. He was given Tylenol suppositories and he passed away 2 hours later on February 6, 2021. According to his wife, they should not have given him the vaccine since he is on hospice; it was not the right decision. "I am worried about the elderly and those very sick."

---

**[VAERS ID: 1074599](#)**

Age: 57                      Hospice: Yes  
Sex: Male                    Vaccinated: 2/2/21  
Location: Minnesota      Date died: 2/3/21

Write-up: Patient was on hospice. He received Moderna's Covid vaccine on February 2, 2021. He passed away the next day on February 3, 2021.

---

**[VAERS ID: 1104430](#)**

Age: 98                      Hospice: 11/12/20  
Sex: Male                    Vaccinated: 3/12/21  
Location: Maine            Date died: 3/13/21

Write-up: Patient was on hospice since approximately November 12, 2020. He received Janssen's Covid vaccine on March 12, 2021. He passed away on March 13, 2021.

---

**[VAERS ID: 1112123](#)**

Age: 77                      Hospice: Yes  
Sex: Male                    Vaccinated: 3/11/21  
Location: Utah              Date died: 3/12/21

Write-up: Patient was on hospice. He received Moderna's Covid vaccine on March 11, 2021. He showed more decline after receiving vaccination and passed away at 9:41 a.m. on March 12, 2021.

---

**[VAERS ID: 1139186](#)**

Age: 83                      Hospice: Likely  
Sex: Male                    Vaccinated: 3/22/21  
Location: Arizona            Date died: 3/23/21

Write-up: Patient received Janssen's Covid vaccine on March 22, 2021. Hospice nurse called and reported that patient passed away on March 23, 2021.

**Deaths Two Days After Vaccination**

**[VAERS ID: 1038442](#)**

Age: 56                      Hospice: 12/28/20  
Sex: Male                    Vaccinated: 1/4/21  
Location: Illinois            Date died: 1/6/21

Write-up: Patient was placed on hospice on December 28, 2020. He received Pfizer's Covid vaccine on January 4, 2021. He passed away on January 6, 2021.

---

**[VAERS ID: 929359](#)**

Age: 76                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/6/21  
Location: Florida          Date died: 1/8/21

Write-up: Patient was on hospice care. He received Pfizer's Covid vaccine on January 6, 2021. Diminished oxygen sats 68%. Oxygen applied, but O2 sats remained low for next 36 hours. Patient expired at 6:22 a.m. on January 8, 2021.

---

**[VAERS ID: 1057363](#)**

Age: 89                      Hospice: Yes  
Sex: Male                    Vaccinated: 2/13/21  
Location: Unknown        Date died: 2/15/21

Write-up: Patient had severe dementia and was in hospice care. He received Moderna's Covid vaccine on February 13, 2021. He passed away on February 15, 2021.

---

**[VAERS ID: 1004206](#)**

Age: 91                      Hospice: Likely  
Sex: Female                Vaccinated: 1/21/21  
Location: Minnesota      Date died: 1/23/21

Write-up: Patient received Moderna's Covid vaccine on January 21, 2021. She passed away on January 23, 2021. At the time of death, she was very fragile and was in hospice care.

**Deaths Three Days After Vaccination**

**[VAERS ID: 1031629](#)**

Age: 85                      Hospice: Yes  
Sex: Female                Vaccinated: 2/8/21  
Location: Iowa            Date died: 2/11/21

Write-up: Patient was on hospice care. She received Moderna's Covid vaccine on February 8, 2021. Patient became nauseated about ten minutes after vaccine administered, this subsided but returned several hours after the vaccine was given. She continued with intractable nausea and vomiting for about 24 hours. She continued to decline and refused to eat or drink. Her emesis was

coffee ground color. After this her condition continued to decline until her death on February 11, 2021.

---

**[VAERS ID: 929997](#)**

Age: 86                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/4/21  
Location: Wisconsin      Date died: 1/7/21

Write-up: Patient was on hospice for about the last month, but was up and around and able to eat, take pills and talk. He received Moderna's Covid vaccine on January 4, 2021. The day after he had his injection he was very lethargic, could only mumble and could not swallow. He was not able to take meds or eat, and was too lethargic to get up in chair. He passed away on January 7, 2021.

---

**[VAERS ID: 920326](#)**

Age: 89                      Hospice: Yes  
Sex: Female                Vaccinated: 12/29/20  
Location: Indiana        Date died: 1/1/21

Write-up: Resident was on hospice services. She received Moderna's Covid vaccine on December 29, 2020. Resident had redness and warmth with edema to right side of neck and under chin. She expired on January 1, 2021.

---

**[VAERS ID: 959272](#)**

Age: 85                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/12/21  
Location: Kansas        Date died: 1/15/21

Write-up: Patient was on hospice. He received Moderna's Covid vaccine on January 12, 2021. He passed away on January 15, 2021.

---

**[VAERS ID: 1075657](#)**

Age: 94                      Hospice: Yes  
Sex: Female                Vaccinated: 3/1/21

Location: Wisconsin      Date died: 3/4/21

Write-up: Patient was on hospice. She received Moderna's Covid vaccine on March 1, 2021. She passed away on March 4, 2021.

---

**[VAERS ID: 1112117](#)**

Age: 88                      Hospice: Yes  
Sex: Male                  Vaccinated: 3/9/21  
Location: Utah              Date died: 3/12/21

Write-up: Patient was on hospice. He received Pfizer's Covid vaccine on March 9, 2021. Nurse practitioner visited with patient on March 10, notable decline/flank pain, fever 101 F. Patient passed away on March 12, 2021.

---

**[VAERS ID: 1075725](#)**

Age: 99                      Hospice: Yes  
Sex: Male                  Vaccinated: 3/1/21  
Location: Wisconsin      Date died: 3/4/21

Write-up: Resident was on hospice. He received Moderna's Covid vaccine on March 1, 2021. He started to have chest pain the next day, and on March 3 he was lethargic and wasn't eating or drinking. He passed away on March 4, 2021.

**Deaths Four Days After Vaccination**

**[VAERS ID: 941561](#)**

Age: 91                      Hospice: Yes  
Sex: Male                  Vaccinated: 1/7/21  
Location: Minnesota      Date died: 1/11/21

Write-up: Resident was on hospice. He received Moderna's Covid vaccine on January 7, 2021. Staff walked into resident's room around 10:00 a.m. and noted resident's left side of face was flaccid and was noted to have an unequal hand grasp with left hand worse. He was able to talk but was mumbled and hard to understand. Resident had a stroke at 10:06 a.m. on January 8. He lost all ability to use his left side and passed away on January 11, 2021.

---

**[VAERS ID: 918418](#)**

Age: 65                      Hospice: Yes  
Sex: Male                    Vaccinated: 12/30/20  
Location: Florida          Date died: 1/3/21

Write-up: Resident was on hospice. He received Pfizer's Covid vaccine on December 30, 2020. Two days later, he became short of breath, congested and hypoxic requiring oxygen, respiratory treatments and suctioning. He stabilized after treatment. He was then found without a pulse and respirations and passed away on January 3, 2021.

---

**[VAERS ID: 985715](#)**

Age: 80                      Hospice: Yes  
Sex: Male                    Vaccinated: 12/29/20  
Location: Florida          Date died: 1/2/21

Write-up: Patient was on hospice. He received Moderna's Covid vaccine on December 29, 2020. He presented at the emergency room the following day stating that he wasn't feeling well. He passed away on January 2, 2021.

---

**[VAERS ID: 1066852](#)**

Age: 76                      Hospice: January 2021  
Sex: Male                    Vaccinated: 2/24/21  
Location: Kentucky        Date died: 2/28/21

Write-up: Entered hospice care in January 2021. He received Moderna's Covid vaccine on February 24, 2021. He passed away on February 28, 2021.

---

**[VAERS ID: 1088180](#)**

Age: 93                      Hospice: 8/11/20  
Sex: Male                    Vaccinated: 3/5/21  
Location: Arkansas        Date died: 3/9/21

Write-up: Patient was admitted to hospice on August 11, 2020. He received Moderna's Covid vaccine on March 5, 2021. He passed away on March 9, 2021.

---

**[VAERS ID: 1122468](#)**

Age: 85                      Hospice: Yes  
Sex: Male                    Vaccinated: 2/1/21  
Location: Unknown        Date died: 2/5/21

Write-up: Patient was on hospice care. He received Pfizer's Covid vaccine on February 1, 2021. He passed away on February 5, 2021.

---

**[VAERS ID: 1132062](#)**

Age: 56                      Hospice: Yes  
Sex: Female                Vaccinated: 3/18/21  
Location: Michigan        Date died: 3/22/21

Write-up: Patient had been admitted to hospice prior to her first dose of the vaccine. She received Moderna's Covid vaccine on March 18, 2021. She passed away on March 22, 2021.

---

**[VAERS ID: 979926](#)**

Age: 81                      Hospice: Yes  
Sex: Female                Vaccinated: 12/30/20  
Location: California      Date died: 1/3/21

Write-up: Patient was on hospice. She received Pfizer's Covid vaccine on December 30, 2020. She began experiencing shortness of breath three days following vaccination and passed away on January 3, 2021.

**Deaths Five Days After Vaccination**

**[VAERS ID: 938974](#)**

Age: 88                      Hospice: Yes  
Sex: Male                    Vaccinated: 1/6/21  
Location: Ohio              Date died: 1/11/21

Write-up: Resident was on hospice. He received Pfizer's Covid vaccine on January 6, 2021. Three days later, he had decreased appetite with vomiting and loose bowel movements. Five days following vaccination, he had blood in stool and passed away on January 11, 2021.

---

**[VAERS ID: 964636](#)**

Age: 81                      Hospice: 11/18/20  
Sex: Male                    Vaccinated: 12/17/20  
Location: Unknown        Date died: 12/22/20

Write-up: Patient was on hospice since November 18, 2020. He received Pfizer's Covid vaccine on December 17, 2020. He passed away five days later on December 22, 2020.

---
