Reports of Serious Injuries After COVID Vaccines Near 112,000, as Pfizer Asks FDA to Green Light Shots for Kids 5 to 11

VAERS data released Friday by the CDC included a total of 778,685 reports of adverse events from all age groups following COVID vaccines, including 16,310 deaths and 111,921 serious injuries between Dec. 14, 2020 and Oct. 1, 2021.

By Megan Redshaw – Telegraph UK, 8. 10. 2021

Data released Friday by the Centers for Disease Control and Prevention (CDC) showed that between Dec. 14, 2020 and Oct. 1, 2021, a total of <u>778,685 adverse events</u> following COVID vaccines were reported to the Vaccine Adverse Event Reporting System (VAERS). The data included a total of <u>16,310 reports of deaths</u> — an increase of 373 over the previous week.

There were <u>111,921 reports of serious injuries</u>, including deaths, during the same time period — up 6,163 compared with the previous week.

Excluding "<u>foreign reports</u>" filed in VAERS, <u>593.728 adverse</u> <u>events</u>, including <u>7,437 deaths</u> and <u>47,455 serious injuries</u>, were reported in the U.S. between Dec. 14, 2020 and Oct. 1, 2021.

Of the 7,437 U.S. deaths reported as of Oct. 1, <u>11% occurred</u> within 24 hours of vaccination, <u>16% occurred</u> within 48 hours of vaccination and <u>29% occurred</u> in people who experienced an onset of symptoms within 48 hours of being vaccinated.

In the U.S., 393.4 million COVID vaccine doses had been administered as of Oct. 1. This <u>includes</u>: 227 million doses of <u>Pfizer</u>, 152 million doses of <u>Moderna</u> and 15 million doses of <u>Johnson & Johnson</u> (J&J).

From the 10/1/2021 release of VAERS data:

Found 778,685 cases where Vaccine is COVID19

The data come directly from reports submitted to VAERS, the primary government-funded system for reporting adverse vaccine reactions in the U.S.

Every Friday, <u>VAERS</u> makes public all vaccine injury reports received as of a specified date, usually about a week prior to the release date. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed. Historically, VAERS has been shown to report only <u>1% of actual vaccine adverse events</u>.

This week's U.S. data for 12- to 17-year-olds show:

• 21,298 total adverse events, including 1,284 rated as serious and 22 reported deaths. Two of the 22 deaths were suicides.

The most recent death involves a 16-year-old male (VAERS I.D. <u>1734141</u>) who reportedly died from cardiac failure five days after receiving Pfizer's COVID vaccine.

Other recent deaths include a 17-year-old male (VAERS I.D. 1689212) with cancer who was vaccinated April 17, tested positive for COVID on July 20, was hospitalized and passed away Aug. 29; and a 16-year-old female (VAERS I.D. 1694568) who died from a pulmonary embolism nine days after receiving her first Pfizer dose.

- 3,202 reports of anaphylaxis among 12- to 17-year-olds with 99% of cases attributed to Pfizer's vaccine.
- <u>520 reports</u> of myocarditis and pericarditis (heart inflammation) with <u>508 cases</u> attributed to Pfizer's vaccine.
- <u>114 reports</u> of blood clotting disorders, with all cases attributed to Pfizer.

This week's U.S. VAERS data, from Dec. 14, 2020 to Oct. 1, 2021, for all age groups combined, show:

- 19% of deaths were related to cardiac disorders.
- 56% of those who died were male, 43% were female and the remaining death reports did not include gender of the deceased.
- The average age of death was 72.8.
- Of the <u>2,935 cases of Bell's Palsy</u> reported, 50% were attributed to <u>Pfizer</u> vaccinations, 42% to <u>Moderna</u> and 8% to J&J.
- 648 reports of <u>Guillain-Barré syndrome</u>, with 40% of cases <u>attributed to Pfizer</u>, 32% to <u>Moderna</u> and 28% to <u>J&J</u>.
- 1,976 reports of anaphylaxis where the reaction was lifethreatening, required treatment or resulted in death.
- 158,280 reports of symptoms of <u>anaphylactic reactions</u> with 43% of cases attributed to <u>Pfizer's vaccine</u>, 49% to <u>Moderna</u> and 7% to <u>J&J</u>. An anaphylactic reaction may include various symptoms like skin rashes, nausea, vomiting, difficulty breathing or shock.

- 9,907 reports of blood clotting disorders. Of those, 4,286 reports were attributed to Pfizer, 3,595 reports to Moderna and 1,975 reports to J&J.
- 2,737 cases of myocarditis and pericarditis with 1,733 cases attributed to Pfizer, 888 cases to Moderna and 106 cases to J&J's COVID vaccine.
