

EcoHealth Alliance's Written Proposals- Admissions, Declarations Etc. Unclassified Memorandum From Commandant Of Marine Corps Fellow, DARPA To The **Inspector General.**

Criminal Implications & Consequences For The Director-General of Malaysia's Ministry of Health

By Matthias Chang – Future Fast-Forward

(A) INTRODUCTION

This is Part 3 of the Three Part Series of the Exposé on the criminal activities of the Director-General (DG) of Malaysia's Ministry of Health under the political leadership of Health Minister, Khairy Jamaluddin (Khairy), an UMNO member.

Part 1 was my video address on Monday, 24th January, 2022 ***"Bombshell: CIA Behind EcoHealth Alliance = 14 Years Coronavirus Research in Malaysia"*** and Part 2 was my second video address produced on Wednesday, 26th January, 2022 and published on Thursday, 27th January, 2022, entitled, ***"Explosive: Signed Documents – Malaysian / MOH Collaboration With EcoHealth Alliance & CIA. Traitors!"***

I had warned publicly and repeatedly that unless the entire political leadership across the entire political divide in Malaysia disowned and commence investigations and the prosecution of the said Health Minister and the Director-General based on the evidence disclosed, then the entire political leadership, the Government and the Opposition are complicit in the criminal activities of the above-named culprits, have authorised and or condoned the said criminal activities that gave rise to the creation of the bioweapon - the Covid19 vaccines in the USA that has devastated the entire world!

In this Part 3 of my exposé, I will explain in greater detail the nefarious links between Peter Daszack and the EcoHealth Alliance on the one part and the medical establishment in Malaysia led and controlled by the said Director-General (DG).

I will also reveal why the US Defence Department kept under wraps and in secret the creation of the bioweapon so as to deny that the US military were involved and pass the buck to NIH, CDC, FDA and Fauci so as to create a false narrative that it was a medical issue and a disease that went out of control – the truth hidden under the veil of deniability.

However, and though the Medical Mafia had no choice but to obey, they inserted an escape clause to avoid being prosecuted for Crimes Against Humanity by inserting and declaring at the BEGINNING PARAGRAPH of each official COMMUNICATION that the FDA, CDC, NIH and Fauci were acting under the express provisions of Section 564 (b) (1) (C) of the FDA Act ie that a disease or an agent associated with a Chemical, Biological, Radiological and or Nuclear weapon (CBRN) was the sole and only basis for declaring an Emergency and THE USE OF TOXIC VACCINES, under the deceptive cover of Emergency Use Authorisation (EUA).

More of the above devastating issue in the discussion below.

From the extracts of the report, and in blunt language, I can say **that only an irresponsible political leader** would dismiss that the issues raised in my Three-Part Exposé **are not National Security Threats faced by Malaysia!**

Is it any wonder that in just under two years, February 2020 to August 2021, Malaysia had three gutless Prime Ministers - **all three being former or current UMNO members?**

Shame, Shame and Shame!

Malaysia has become a “Banana Republic / Failed State” by any reckoning!

(B) THE BIOLOGICAL WEAPON

(1) The US has repeatedly announced since 2020 and even till to-date that an Emergency has been declared in the United States, which was thereafter followed by the European Union, WHO and other countries, including Malaysia. We now refer to *THE* letter from the FDA to Pfizer Inc. This letter is dated the 23rd August 2021 and we quote:

“On February 4, 2020, pursuant to Section 564(b)(1)(C) of the Federal Food, Drug and Cosmetic Act (the FD&C Act or the Act), the Secretary of the Department of Health and Human Services (HHS) determined that there is a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad, and that involves the virus that causes Coronavirus Disease 2019 (COVID-19).”

“On December 11, 2020, the Food and Drug Administration (FDA) issued an Emergency Use Authorization (EUA) for emergency use of Pfizer-BioNTech COVID-19 Vaccine for the prevention of COVID-19 for individuals 16 years of age and older pursuant to Section 564 of the Act.”

We can say with confidence that no one that we are aware of (including lawyers etc in USA, until we informed them) took the trouble to analyse what the hell is Section 564 (b) (1) (C) of the FDA Act, incredible as it may seem.

In essence, an Emergency was declared because bio-weapon(s) was unleashed in USA by the Deep State actors ***via an alleged leak in Wuhan, China to enable the US to avoid any blame. This was a sinister diversion because FDA, CDC and EcoHealth Alliance were funding Malaysian entities since 2014, led by Tom Hughes as the Mastermind and Country Co-ordinator.***

(2) We now refer to **Section 564(b)(1)(C):**

(b) **Declaration of emergency**

(1) *In general*

The Secretary may declare an emergency justifying the authorization under this sub-section for a product on the basis of:-

(A) a determination by the Secretary of Homeland Security that there is a domestic emergency, or a significant potential for a risk of attack with a specific biological, chemical, radiological, or nuclear agent or agents;

(B) a determination by the Secretary of Defense that there is a military emergency, or significant potential for a military emergency, involving a heightened risk to United States military forces of attack with a specified biological, chemical, radiological, or nuclear agent or agents; or

(C) a determination by the Secretary of a public health emergency under section 247d of title 42 that affects, or has a significant potential to affect, national security, and that involves a specified biological, chemical, radiological, or nuclear agent or agents, or a specified disease or condition that may be attributable to such agent or agents.

(3) *Sub-para (c) above therefore refers to: 4 types of biological warfare – (i) biological, (ii) chemical, (iii) radiological, or (iv) nuclear agent or agents (CBRN) or a special disease or condition that may be attributable to such agent or agents. It is obvious that the biological warfare cannot be nuclear warfare as there have not been any nuclear explosion and neither could it be radiological warfare as no one in the world has suffered the effects of radiation. Additionally, it cannot be chemical warfare because in the letter of FDA it*

refers specifically the virus that allegedly caused COVID-19. Therefore, biological warfare was unleashed for purposes which will be explained later.

(4) The FDA Act is a very old legislation with extensive powers. However unknown to 99% of people in America and the world, the biological warfare was in preparation way back in 2013 and not as commonly believed in 2019 when Bill & Melinda Gates Foundation revealed their plan to depopulate the world.

(5) In 2013, the 113th Congress enacted a new law referred to as **“Pandemic and All-Hazards Preparedness Reauthorization Act of 2013”**. The objective of this Act is:

“The Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (PAHPRA) contains key legal authorities to sustain and strengthen our Nation’s preparedness for public health emergencies involving chemical, biological, radiological, and nuclear (CBRN) agents, as well as emerging infectious disease threats.”

We are confident that no Intelligence Apparatus in Malaysia has even heard of this Pandemic and All-Hazards Preparedness Reauthorization Act of 2013. It is clear therefore that the Deep State in USA was prepared for all eventualities, including any backlash or counter-attack by victim countries who suffered loss, damage and deaths from the unleashing of the biological warfare by America.

It follows therefore that **COVID-19** is only one facet or the First Phase of the said weapon, followed by the forced and mass vaccination of people as the Second Phase which is more insidious facet of the said weapon.

The First Phase is to get people infected and sick so as to introduce the Second Phase, the alleged sole remedy via vaccination to allegedly “counter” the infection.

Recalled that the Deep State actors revealed that there was **no cure for COVID-19** as contained in the Green Book published by the UK Government. If there is no cure for COVID-19, what is the insidious purpose of the forced vaccination with vaccines which contains toxic substance which would injure and or kill the recipients of the toxic vaccine?

(6) Since February 2021, Khairy Jamaluddin and the DG of MOH whipped up the hysteria and fear that there is only one solution and cure for COVID-19 that is to say, mass vaccination of all Malaysians. Malaysian victims fell for the lie, propaganda and manipulation because they were not and could not be aware that the British Government has already confessed that there is no cure for COVID-19.

(C) DARPA – PREventing EMerging Pathogenic Threats (PREEMPT)

On January 19, 2018, DARPA, Biological Technology Office issued a public announcement that DARPA would be soliciting innovative proposals **“to develop new tools and models to quantify the likelihood of a virus to jump from an animal host into humans, and to develop and validate new scalable technologies to target potential human-capable viral pathogens in wild reservoirs and/or mosquito vectors to prevent transmission to humans.”** This Broad Agency Announcement (BAA) is contemplated in the Federal Acquisition Regulation (FAR) 6.102(d)(2) and 35.016 and 2 CFR s200.203.

DARPA’s rationale for the procurement of proposals and programs are:

(i) Research Objectives

PREEMPT research objectives are structured along two Technical Areas (TAs). Both Technical Areas must be performed in parallel by vertically integrated interdisciplinary teams. Proposers must present a Plan to address both Technical Areas and meet key milestone decisions points that occur at the end of year 2.

- 1) **TA1:** Develop and validate integrated, multiscale models that quantify the likelihood a human capable virus will emerge from an animal reservoir residing in a **“hot-spot” geographic region**, such as in SE Asia region and Malaysia.
- 2) **TA2:** Develop scalable approaches that target and suppress animal virus in its reservoir(s) and/or vector(s), to **reduce the likelihood of virus transmission into humans.**

(ii) Program Overview

Now read the extract below and appreciate how US prepare their **“warfighter”** (that is the term used by DARPA) for war!

In a **Total War Scenario**, everyone must fight for the country, not just the military. Hence, for numskulls, the term **WARFIGHTER** is used! Malaysians, get this into your freaking thick heads!

Diagram – illustrated in EcoHealth Alliance Proposal for DARPA

During U.S. international operations, military forces are deployed to remote locations around the globe, often in areas where endemic and emerging diseases are prevalent. **Most of these emerging and re-emerging diseases originate in animal reservoirs and then jump into humans.** Numerous trends, including the increased interactions between human, animal and insect populations **due to increased population densities, globalization, densification of livestock production, and rising human encroachment into animal habitats, have increased the risks of new viral outbreaks in those regions where Department of Defense (DoD) personnel are typically deployed.** Often, DoD personnel are among the first responders in outbreak situations. Emerging infectious diseases, for which **few medical countermeasures are available, represent a major threat to the warfighter and national security and could have devastating impacts on U.S. public health.**

Despite bio-surveillance efforts around the globe, new viral outbreaks continue to outpace preparedness efforts and show no signs of abating. **During the first three quarters of 2017 outbreaks of avian influenza A (H7N9), Chikungunya, MERS coronavirus, Ebola, Seoul virus, Hepatitis E, Hepatitis A, Yellow Fever, Lassa and Zika viruses were recorded.** While current bio-surveillance strategies focus on detection of known pathogens within the human population following an infectious outbreak event, there is a dearth of research and surveillance on sentinel or reservoir animals. **Animal-specific viruses that have the potential to infect humans (namely “human-capable” pathogens), but have not yet spilled over into human populations, are rarely considered.** As a result, infectious agents are detected only after an

outbreak—that is, after an animal pathogen has adapted to become capable of infecting humans. Consequently, the outbreak response is largely reactive and not initiated until after an epidemic has already begun. **The PREEMPT program represents a radical departure from current practice, aiming to target viral bio-threats within the animal reservoirs where they originate and preempt their entry into human populations before an outbreak occurs.**

Recently, the scientific community has advanced its understanding of host-pathogen genetics and mechanisms of adaptation across hosts, developed analytic tools to predict animal hosts of new and potential human-transmissible viruses, and **learned how to identify “hot spot” geographic regions where an animal-to-human virus jump is imminent.**

This understanding is empowered by new high-throughput data generation capabilities and sophisticated analytic and computational tools. Together, this new understanding and capability hold great promise for the development of advanced integrated models that can assess and likely provide guidance for action that prevents human virus emergence before the virus gains entry to the human population.

The **PREEMPT** program aims to develop new tools and models to **quantify the likelihood of a virus quasi-species (QS) to jump from an animal host into humans. In parallel, PREEMPT seeks to develop and validate new scalable technologies that prevent transmission of viral pathogens in wild reservoirs and/or mosquito vectors to humans or to bridge animals that serve as intermediary hosts prior to virus jump into human.**

(D) PROPOSAL FROM ECOHEALTH ALLIANCE – PROJECT DIFFUSE

On **24.3.2018**, Alexei Chmura, Chief of Staff of EcoHealth Alliance submitted their proposal. The title is staring at our faces, but few would notice that the proposal is entitled: **Project DEFUSE : Defusing the Threat of Bat-borne Coronaviruses.** Yet, political idiots at the highest levels are totally clueless why for over 14 years, Peter Daszack of EcoHealth Alliance in partnership with Tom Hughes (country coordinator for Malaysia) were conducting Gain-of-Function research on Bat viruses in the caves of Miri (Sarawak), Kota Kinabalu (Sabah) and Perak (Peninsular Malaya).

However, the said proposal was rejected for reasons stated below:

Reasons for Rejection

The Biological Technologies Office of DARPA reviewed the EcoHealth Alliance DEFUSE proposal and the Evaluation Reports and decided it was “selectable”. In doing so, two out of three reviewers considered the aim of preempting “zoonotic spillover through reduction of viral shedding in the bat caves” as of interest to DARPA. These reviewers assessed the EHA and Collaborators team and concluded that:

They have plenty of prior experience.

They have access to Yunnan caves where bats are infected with SARSr viruses.

They have carried out past surveillance work.

They have developed geo-based risk maps of zoonotic hotspots. Their proposed experimental work is logical and can validate molecular and evolutionary models. Their proposed preemption approaches can rapidly be validated using bat and "batenized" mouse models.

The above strengths / merits were as a result of covert research, funded previously by various sources, in the caves of Sarawak, Sabah, Peninsula Malaya and in China. The human samples, the Orang Asli and the Malay communities were the deceived victims of this hideous Gain-of-Function (GoF) research, aided and abetted by the Medical Mafia of MOH led by the DG! And presently a small group sam-SENG doctors who has the audacity to designate themselves as “experts” are making press statements to promote mass vaccination through fear and intimidation. These sam...Seng doctors better run and hide, if they can, as I am hunting them down for their crimes!

However, the Biological Technologies Office did not recommend it be funded at that time because significant weaknesses were identified:

1. The proposal is considered to potentially involve GoF/DURC research because they propose to synthesize spike glycoproteins which bind to human cell receptors and insert them into SARSr-CoV backbones to assess whether they can cause SARS-like disease.
2. However the proposal does not mention or assess potential risks of Gain-of-Function (GoF) research.
3. Nor does the proposal mention or assess Dual Use Research of Concern (DURC) issues, and thus fails to present a DURC risk mitigation plan.
4. The proposal hardly addresses or discusses ethical, legal, and social issues (ELSI).
5. The proposal fails to discuss problems with the proposed vaccine delivery systems caused by the known issues of variability in vaccine dosage.

6. The proposal did not provide sufficient information about how EHA would use any data obtained and how they would model development or perform any necessary statistical analysis.
7. The proposal did not explain clearly how EHA will take advantage of their previous work, nor how that previous work could be extended.
8. The proposal failed to clearly assess how it would deploy and validate the “TA2 preemption methods” in the wild. This refers to carrying out experiments with effective immune boosting molecules and delivery techniques via FEA aerosolization mechanism at one test and two control bat cave sites in Yunnan, China (PARC, EHA, WIV).
9. The proposal does not address concerns about these vaccines not being able to protect against the wide variety of coronaviruses in bat caves which are constantly evolving, due to insufficient epitope coverage.

It is clear that the proposed DEFUSE project led by Peter Daszak could have put local communities at risk by failing to consider the following issues:

- **Gain-of-Function**
- **Dual Use Research of Concern**
- **Vaccine epitope coverage**
- **Regulatory requirements**
- **ELSI (ethical, legal, and social issues)**
- **Data Usage**

Did not the above conclusions put Malaysia at risks? Yet, collaboration with EcoHeath Alliance continued in Malaysia, funded by Fauci's controlled organisations.

So, it is ok and acceptable for Anwar (PKR), Lim Kit Siang (DAP), Mat Sabu (Amanah), Tun M (Pejuang), Tan Sri Muiyiddin (Bersatu), PM, Ismail Sabri, Zahid Hamidi, Najib Razak (UMNO), Wee Ka Siong (MCA) and Tan Sri S.A. Vigneswaran (MIC).

But it is not ok and or acceptable for we, the Patriots to put our country at risks and endanger the lives of the rakyat! Over our dead bodies!

(E) WHAT WAS DISCLOSED IN THE PROJECT DEFUSE – ANALYSIS BY COMMANDANT, MARINE CORPS FELLOW, DARPA

In this part of my article, I will drill down the nails into the coffin and bury DG, Khairy and the entire Medical Mafia within the MOH and show why the toxic vaccines have destroyed and will continue to destroy our country irreparably by the further mass vaccination of booster shots, the futility of the next fourth and even the fifth shot, and other sinister scams to inject more and more vaccines into bodies of our brainwashed citizens. The files are now held by Marine Corps Intelligence Activity (MCIA).

Extracts:

SARSr-CoV, is a synthetic spike protein chimera engineered to attach to human ACE2 receptors and inserted into a recombinant bat SARSr-CoV backbone. The reason the disease is so confusing is because it is less a virus than it is engineered spike proteins hitch-hiking a ride on a SARSr-CoV quasi-species swarm. The utility of certain counter measures can be extrapolated from the documents:

- The team selected for SARSr-CoV that were most monoclonal antibody and vaccine resistant.
- It is not practical to inoculate directly with shots, nor can bats give respiratory infections from droplets, so the team developed an aerosol to deliver the inoculations directly into the caves.
- The proposal notes that interferon and chloroquine phosphate inhibit SARSr-CoV viral replication.

Because of its (now) known nature, the SARSr-CoV-WIV illness is **readily resolved with early treatment that inhibits the viral replication** that spreads the spike proteins around the body (which induce a harmful overactive immune response as the body tries to clear the spikes from the ACE2 receptors). **Many of the early treatment protocols ignored by the authorities work because they inhibit viral replication or modulate the immune response to the spike proteins which make sense within the context of what EcoHealth Alliance was creating.** Some of these treatment protocols also inhibit the action of the engineered spike protein. **For instance, ivermectin (identified as curative in April 2020) works throughout of phases of illness because it both inhibits viral replication and modulates the immune response. Of note, chloroquine phosphate (Hydroxychloroquine, identified April 2020 as curative) is identified in the proposal as a SARSr-CoV inhibitor, as is interferon (identified May 2020 as curative).**

The gene-encoded, or “mRNA,” vaccines work poorly because they are synthetic replications of the already-synthetic SARSr-Cov-WIV spike proteins and possesses no other epitopes. The mRNA instructs the cells to produce synthetic copies of the SARSr-Cov-WIV synthetic spike proteins directly to the blood stream wherein they spread and produce the same ACE2 immune storm that the recombinant vaccine does. **Many doctors in the country have identified the symptoms of vaccine reactions mirror the symptoms of the disease which collaborates with the similar synthetic nature and function of the respective spike protein.**

The vaccine recipient has no defense against the blood stream entry, but their nose protects them from the recombinant spike protein quasi-species during “natural infection” (better termed as aerosolised inoculation).

Furthermore, the EcoHealth proposal states that a “vaccine approach lacks sufficient epitope coverage to protect against quasi-species of coronavirus”. Consequently, they were trying to make vaccines work by “targeted immune

boosting via vaccine inoculators using chimeric polyvalent recombinant spike protein". **The nature of using a spike protein vaccine with one epitope against the spike protein vaccine with a quasi-species may explain the unusual (and potentially detrimental) antibody response among the vaccinated to the new covid variants.** Fundamentally, the knowledge proposal provides signals that the risks of Antibody Dependant Enhancement (ADE) from vaccination should be evaluated by high priority on top of the reality that **single epitope vaccine would have little effect against SARSr-Cov-WIV as indicated in the proposal.**

This information is sufficient for an investigative report and more than enough to correct the existing pandemic strategy. Previously, the nation did not know itself, nor the adversary in the pandemic conflict. Now it knows both. The problem can be framed appropriately and specifically against a confirmed hypothesis.

Limiting disease transmission can be dropped as the implied strategy and, it is not the actual problem, nor is it actually feasible. The strategy will then align early treatment protocols and prophylaxis with the known curatives as ways and means. This course of action will achieve the strategic end of clinical resolution for those that are susceptible to the adverse effects from SARSr-Cov-WIV.

The details of this program have been concealed since the pandemic began. These details can be found in the EcoHealth Alliance Proposals response to the DARPA PRE-EMPT Program Broad Agency Announcement (BAA) HR00118S0017, dated March 2018.

Peter Daszak lays out step-by-step what the organization intends to do by phase and by location. The reasons why nonpharmaceutical interventions like masks and medical counter measures like the mRNA vaccines do not work well can be extrapolated from the details. The reasons why the early treatment protocols work as curatives are apparent.

SARS-CoV-2's form as emerged is likely as a precursor, deliberately virulent, humanised recombinant SARSr-CoV that was to be reversed engineered into a live attenuated SARSr-CoV bat vaccine. Its nature can be determined for analysis of its genome with the context provided by the EcoHealth Alliance Proposals.

The EcoHealth Alliance responds to the PREEMPT BAA is placed along with other proposals documents in the PREEMPT folder on the DARPA Biological Technologies Office JWICS (top secret) share drive, address: Network / Filer / Bto / Ci Folder / Preempt. The unmarked nature combined with the timing signals that the documents were being hidden. No files at DARPA go unmark in classification or distribution, including proprietary documents. The files are now held by Marine Core Intelligence Activity (MCIA).

(F) **The Malaysian Connections (Hidden In Plain Sight) With The USA's Secret BioWeapon Development Plan via Dr. Fauci & The EcoHealth Alliance Network**

For the purposes of this part of my article, you are required to open my video address uploaded to my website on Thursday 27th January, 2022 and refer to the exhibits disclosed in the said video (for which you would have obtained the screenshots). My commentaries below relates to the exhibits referred therein.

- (1) Before proceeding with the substance of our investigations on this topic, we would like to refer to the meaning of “Biological Weapon” and “Gain-of-Function Research” :-

Biological weapon is any infectious disease agent, such as Bacteria, Virus or Toxin, which is used intentionally to inflict bodily harm to people, animals or nature. They can be used to cause massive casualties, social disruption, economic losses and environmental problem as a means of warfare or terrorism. Biological weapons are difficult to handle after release because they are infectious agents and spread uncontrollably beyond the target area.

The term, Gain-of-Function Research, describes a type of research that modifies a biological agent so that it confers new and enhanced activity to that agent. Some scientists use the term broadly to refer to any such modification. In essence, Gain-of-Function research genetically alters an organism in a way that may enhance the biological functions of gene products. This may include an altered pathogenesis, transmissibility or host range, i.e. the types of hosts that a micro-organism can infect.

- (2) The **First link** in the chain of evidence / Intel is to establish the nexus between (i) **US National Institute of Health (NIH)**, (ii) **Centers For Disease Control and Prevention (CDC)** **with** (iii) **EcoHealth-Alliance** who financed and collaborated with (iv) **Malaysian entities**.

NIH with Eco-Alliance. See video Exhibit

CDC with Eco-Alliance. See video exhibit

- (3) The **Second link** in the chain of evidence / Intel is to establish the nexus between (i) **Eco-Alliance** and the **Malaysian Country Co-ordinator** who controlled (ii) **Malaysian Medical Entities**.

Eco-Alliance with Tom Hughes, Malaysian Country Co-ordinator. Tom Hughes was and still is Controller of Medical Intelligence for UK and USA in the three “administrative regions” of Malaysia – (i)

Peninsular Malaya (ii) Sarawak and (iii) Sabah, to borrow their own terminology.

Biographical Sketch of Tom Hughes,

*“For the past ten years I have acted as the Malaysian Project Coordinator **for Eco-Alliance**. I have **designed, initiated and managed collaborative** projects on **surveillance, viral discovery** and ecology of wildlife reservoirs of zoonoses. As the Malaysia country coordinator for the **USAID** funded EPT / PREDICT project, which tested hundreds of wildlife, livestock and **human samples annually**, I will be able to support the PCR-serology **data needs** of the project..... In 2014, I incorporated and became the director of **Conservation Medicine Ltd** in Malaysia to manage these and other projects.”*

- (4) The principal Malaysian entities and personnel of this nefarious network answerable to a foreign controlled intelligence asset are collectively identified in my video address and segregated to the three regions of (i) Sarawak, (ii) Sabah and (iii) Peninsular Malaya and (iv) Private Sector.

The **names and designation** of the **Malaysian personnel** of the Network is extracted from the Report of Peter Daszak of EcoHealth – Alliance.

Given the names and stature of the said Malaysian entities which are directly or indirectly under the jurisdiction and control of the Ministry for Health, it is inconceivable that the Director General (DG) is not aware of or did not allow the state of affairs to prevail, as the money trail and funding has to go through official channels. **The DG and the current Health Minister must etc. be thoroughly investigated. Two former Health Ministers, Chua Jui Ming and Liow Tiong Lai have no prior knowledge, as the network became effective from 2014 till today.**

(G) WE MUST INVESTIGATE THE NATIONAL SECURITY THREAT!

It may be acceptable to the politicians (Members of Parliament and State Assemblymen/women) that the status quo remains and that no criminal actions be taken against DG and his Medical mafia protected within MOH. It is not acceptable to me and the patriots fighting to save our country from criminal and nefarious actors, foreign and domestic.

The entire medical profession, save for a minority of fearless and ethical doctors, have betrayed our country and the rakyat!

There are now only two institutions that can safeguard the country – the PDRM and the Military. But, as the foregoing discussion shows, the integrity of these institutions have been compromised because our enemies have succeeded in the mass vaccination of our heroic warriors. The National Security Apparatus must now make an urgent decision.

If the US Defense Department, have by the documents revealed in this article, anticipated the danger of bioweapons to their WARFIGHTERS, how can we stand pat and not warned our warriors of this danger which has been unleashed against them. It is treachery of the highest order that we do nothing after this alarm.

I have as a patriot done my duty to King and Country. I have made my choice and I am fighting in the frontlines without fear or favour. My only guide and inspiration is God Almighty and I know that I am under his protection!

What are you, as a citizen going to do about this insidious danger?

Matthias Chang
28th January, 2022.
