

Top Secret - Exposing Junk Economics & Finance Taught In Economics Faculties Of All Western Universities And Their Clones

By Matthias Chang – Future Fast-Forward

INTRODUCTION

I can guarantee without any fear of contradiction by any so-called experts in economics that what I am disclosing in this article is never taught in any economics faculties in Western universities and their clones!

I dare you to prove me wrong!

What I am disclosing is less than 50% of what is needed to expose the lies and damned lies of the fraud which you have been brainwashed to believe. This is an article, not a book or a thesis, so I CANNOT expose 100% of the Trash and Myths that you have been subjected to.

SOME UNBLEMISHED TRUTHS

- 1) All imperialist / colonial economies **without exceptions are war driven economies;**
- 2) All imperialist / colonial currencies **are instruments of control, subjugation and oppression** of local / domestic economies;
- 3) All imperialist / colonial markets **are sources of wealth** for the imperialist / colonial powers' home countries;
- 4) All imperialist / colonial powers and their elites **select and or re-select political leaders** to implement and enforce the **policies already decided, after the selected or re-selected political leaders have agreed** with the express and implied terms of the selection / re-selection and to maintain and sustain the façade of power within the agreed term limits – hence the **bogus two party system and the façade of elections;** and
- 5) **Coups and or counter-coups** (foreign and or domestic driven), are initiated to ensure and achieve the **stated objectives in the above sub-paragraphs (1) – (4).**

SOME HISTORICAL TRUTHS AND MYTHS

Time and space compels me to confine the exposé of the economic secrets and myths of the 20th and 21st centuries to a few issues in this article, which should be sufficient to expose certain lies and myths and to spur the hardworking and disciplined minds to embark on further research to learn the whole truth.

The 20th Century is the bloodiest, most violent and war driven century in all history - two World Wars – **WWI** and **WWII** and the **Cold War started even before the end of WWII** in the first half of the 20th Century. Nuclear weapons were unleashed on Nagasaki and Hiroshima.

Historians - Hobsbawm, Gabriel Kolko and Niall Ferguson have described the 20th Century respectively as “Age of Extremes”, “Century of War”, and “The War of the World”.

Some historians have referred to the proxy wars in Latin America, Middle-East and Asia as “Third World Wars” (“**third**” in the sense that wars were waged in the “**Third or Developing World**”) and one renowned Zionist (Norman Podhoretz) has categorised the present / current war as the **Fourth World War (WWIV)**.

SOME ECONOMIC FACTS YOU NEED TO KNOW

No country can wage “total / world wars” unless **its economy is substantially organised and geared for war. Period!**

This is an important factor to grasp and understand. It is also the basis to determine whether a country engaged in any wars will win or be defeated.

The British imperialist economy was mainly geared for “colonial wars” throughout the early years of the 20th century as she was able to colonise and suppress by “Gun-Boat Diplomacy” and with a relatively small military as the target countries were not industrialised for war. It was not a surprise that the then Malaya was conquered by the Japanese in a matter of weeks and Britain surrendered meekly. Please remember I am confining to the 20th and 21st centuries only!

In WWI, Britain was almost defeated in 1916 as Britain did not have a war economy and had the US not entered the war, as an ally, Britain would not have been able to delay the collapse of her empire till after WWII. In the years between WWI and WWII, Germany transformed its economy and re-armed. Its economy was geared for war. The several agreements between Germany and Russia and Britain merely afforded precious time to Germany to prepare for a world war. Britain did not have the industrial capacity for a world war and without America’s assistance, the Western Front commencing with the invasion of Normandy would not have been feasible.

WWII was the continuation of WWI, culminating in the military, financial and economic supremacy of the US because WWI did not resolve the outstanding issues of the European warring states and it is accepted that WWII was the continuation of WWI.

WAR ECONOMIES

It takes years to transform a “peace” economy to a “war” Economy and sustained the same for the duration of the war. It is even harder to convert a war economy to a peace economy without massive structural changes, massive unemployment and stunted GDP growth. Hence the need for wars, to be precise, wars that will stretch for decades – examples, Vietnam War, the Afghanistan War, The Syrian War, and now the Ukraine war.

US, to sustain her hegemony and empire must have wars but there is no way for US to transform its economy to a “peace” economy without the risk of a social revolution or a civil war.

Illustration: A country cannot just stop war equipment production and its huge stock surplus. Out-dated weapons must be ordered, purchased and stored to avoid bankruptcies and massive unemployment. There is only so much military equipment a country can produce and stored before it reaches a saturation point. In my estimation, year 2000 was the saturation point and that gave rise to the 9/11 false flag operation, followed by the global war on terror soon after.

There must be an external threat and danger to justify this political and economic fraud and mischief. Why do you think the Cold War followed WWII before it ended and continued for decades till 1991 when the Soviet Union collapsed and the Cold War ended as a theatrical farce!

The global arm industry was choking and needed wars. It is utterly BS to assert that auditors cannot audit Pentagon. The truth cannot be revealed that US\$7 Trillion (maybe more) were diverted to propped up and bailed out the “Military-Industrial Complex”.

President Trump wanted to shift the burden to Europe and for NATO to increase defence spending and to provoke Russia into a war. But Europe led by Germany did not have the requisite war economies to take on Russia.

The war parties and global elites took a page from WWII. Just as Poland was the bait for Hitler in WWII, Ukraine was the bait and she was seduced on the promise of membership to NATO and the European Union, to take on Russia.

It was a brilliant idea but the War Parties and global elites miscalculated.

Brilliant, in that all the out-dated and surplus military weapons and equipment in storage in USA and Europe can be off-loaded to Ukraine since they thought that Russia had only WWII weapons and equipment and her economy was not on a “war economy” footing. It follows that after the massive off-loading of used and out-dated weapons and equipment, the Military–Industrial-Complex can be

refinanced and shored-up without any protest as there is now the dreaded and feared enemy in the shape and form of Russia and the added threat of the Yellow Peril of China - Plan B in the Obama's Pivot to Asia.

Zelensky was bribed, bought and paid for to agree to the above grand scheme and was "selected" to be the President of Ukraine with the further promise of massive bribes.

A huge miscalculation because Putin and Russia knew the grand plan as Putin is a leader who is well acquainted with history and prepared Russia for war since 2014, when the coup was launched in Ukraine by Victoria Nuland for the US State Department.

The Secretary General of NATO has now conceded that the war against Russia started in 2014.

As in WWII when Hitler / Germany attacked the then Soviet Union on the instigation of Britain, Boris Johnson, former PM, was also the provocateur in the current war against Russia and instrumental in scuttling the peace deal between Ukraine and Russia (i.e. the Minsk Agreement).

Similarly, USA agreed to be the bully boy and do the heavy lifting in the current war against Russia, as in WWII.

The US had no little or no choice as without a prolonged war, the entire US economy and the US\$ as the global reserve currency would collapse and hasten the end of the American Empire and Century, which was delayed only because of the Covid19 pandemic. This bioweapon war was the first stage in the current global war against Russia and China.

NATO in the recent Munich Security Conference /Summit declared that the war with Russia would go on for at least a decade, even as Ukraine has lost the war against Russia. Without a prolonged war, the European economies would also collapse, starting with the German economy.

The bulk of the financial aid to Ukraine was to finance the purchase of out-dated weapons and equipment and to bail out the Military-Industrial-Complex of US and Europe.

IMMIGRATION TIME-BOMBS

The US and Europe could not compete with China as there was huge disadvantage in the labour costs. So, industries were hollowed out from USA and Europe to China. The rationale was that the US\$ was **the** currency for global trade and the world's reserve currency. This was the unchallenged might of the US hegemon.

Any attempt by China, Russia or even Japan would result in an unequal fight in the global financial war – trade wars, sanctions wars, currency wars etc.

That strategy failed and the Emperor was caught “without any clothes”.

However, Russia and China more than survive the financial wars.

The US and Europe have only two cards left – (1) nuclear weapons and (2) cheap labour, with an uncontrolled immigration from the South of American borders. Millions cheap labour poured into USA and channelled to Blue states that require huge and cheap immigrant labour force.

There was a precedent in ASEAN to be followed.

Malaysia’s policy on immigrant labour force (legal and illegal) initially from Indonesia and the drastic change in the voters’ demographics was an added bonus. This was cloned to suit the circumstances of US by the Elites. It was a no brainer!

And when immigrants to Malaysia were later enlarged to include immigrants from other countries in the ASEAN region, the floodgates were opened to allow anyone to come into the USA. Immigrants being immigrants will always vote for the government who has facilitated their entry.

The real issue was not that USA is the “promised land”.

It was cheap labour because Americans do not want to do the dirty menial work as was the case in Malaysia and the differential currency exchange rates was the critical factor for monies repatriated to families by the immigrants. Other than Singapore, Malaysia enjoyed this differential exchange rate with her other neighbours. The same applies to USA (US\$) and immigration to Europe (€ Euros).

In the USA, the rules were so blatant that even an immigrant can vote in the presidential elections, notwithstanding he or she is not a citizen.

So cheap labour will enable US and Europe to compete with China, and later India and Africa! It was an unprecedented “home run” and the entrenched control of political power by President Biden and the Democratic Party.

Need I say more???

Food for thought: When a US drone cost US\$30 million is disabled and or shot down by a drone manufactured for less than US\$10K, it make no sense to have high labour costs. So goes the thinking of US Elites.

But who am I to teach economics to experts with PhDs from Harvard, Princeton, Cambridge or Oxford etc.?

US GDP IS A SCAM – LESS THAN THE VALUE PROPAGATED BY US TREASURY

Why a scam? We need only to examine one factor.

The global big banks control the global **DERIVATIVES MARKET** which notional value is estimated to be in excess of US\$ 1 Quadrillion (one (1) thousand US\$ Trillion is one (1) US\$ Quadrillion). The top five US banks control the derivatives market.

I will be very generous. If the US GDP is US\$50 Trillion (which it is not) it is still less than the notional value of the derivative market. Go figure out yourself.

Total debts (still counting and climbing) is estimated to be in excess of US\$34 Trillion. And the global Central Banks were “investing” in US Treasuries when interest rates were so low as to be near ZERO. They are now valued as junk!!!

So, what is the value of your country’s reserves?

So, what economics are you studying at the economics faculty of your University?
