

Whisper's 7th Sharing With The World – Share, Not Persuade

Shared by Matthias Chang

I was lost, but I am now truly “found”.

I was so frustrated for many years, seeking words to express what were communicated to me by Whisper in the strictest confidence. I failed! Yes, I failed but, only in one sense, as I was not to share what I cannot express in words.

I shared with all of you the “Language of Touch” but so few bothered to internalise this profound sharing But, I longer feel that I had failed.

Why?

Scientists through the ages could not express their discoveries in the spoken word or the “common language” of their time. They found an “almost and the closest alternative – the “Language of Mathematics”.

Even then, they were so frustrated because so few understood ‘Mathematics’ so they fell back on the “common language” of their community Arabic, English, German, French, Mandarin etc.

But, they failed and failed again and again - even resorting to the use of a slang – “Big Bang” to explain their misperceptions as to how **“their world”** was created!

“Big Bang”! Yet it explains nothing but created more questions ... What was before the Big Bang? What is singularity? Who created the Big Bang? The philosophers and theologians invented a word “God”! Yet, so many could not understand and got lost in the journey in search of the answer - Is there God? What is God? And there are so many Gods. But, there are religions and “Believers” that insist that there is but One God! Is this the “singularity” they are referring to? Every religion is divided and split, and each “school” of thought insist that their interpretations are correct. And the people who disagreed, are labelled “Disbelievers”, “Sinners”, “Infidels” etc.!

Whisper came to me, and lovingly confided,

“Why do you think, through the millennia only those who are genuine in seeking, **MEDITATE** and kept in silence when they could not explain and or reveal what was conveyed through meditation but, could not be expressed in any language, not even the ‘mathematical language’ ”.

“This is the reason why we commanded you to SHARE but never to PERSUADE, as even when you tried to explain, the ignorant and arrogant

would not accept the explanations. Did they not say, for example when you visited the Antarctica and referred to the “DIVINE” experience that you were exaggerating and maybe disillusioned, after all Antarctica was a barren snow / ice covered mass.”

“They could not understand why you used the word “divine” which was the closest word to express your experience – they slandered you with words such as – hyperbole, disillusioned, madness, retarded, crab spiritual experience etc.”

“What you received and could not explain, cannot or meant to be shared. If that is not so, why after thousands of years, after the appearance of so many “teachers” and “Prophets” and so many Holy Scriptures, there are literally thousands of books, scrolls, manuscripts, theses, transcripts of debates, oral transmissions etc. that have challenged the so-called ‘established truths’?”

“This is because ‘God’ / ‘HIS’ Truths cannot never be explained but only experienced. Maintain your silence in the soundlessness of that Abode and just listen with your Heart and communicate in the language of ‘Touch’. There is no need for any explanation Those who have experienced will ‘Touch’ you and you know that they know and they in turn know that you have been blessed and know. All souls have the opportunity to ‘know’. No one is blocked and prevented from knowing. They have to discover for themselves and they will know. There is no need to Persuade!”

“All Holy Scriptures are your guide. Read and meditate and the path will be given to you. Do not argue and debate that you have the answers with anyone who is not on the path.”

“Finally, we caution you ... avoid the ‘champions’, the so-called ‘defenders’ of faiths, those who wear the name of their religion on the lapels of their outer garments, those who use religions for self-seeking agendas and ambitions, the political harlots.”

“Those who are humble, searching for answers are your companions.”

“Lonely is the journey for those who are in search for Truths – not for money, fictitious power / authority, and not ‘sellers’ of religions. Avoid them like plagues.”

I am not frustrated as before, and I realised that there are ‘many’ out there who know what I know ... and by touching, we are “found”.
