

The Search For Infinity - The Intellectual Fraud Exposed

By Matthias Chang –Future Fast-Forward

Introduction

Very, very few intellectuals and “defenders” of God dare approach this subject for fear that they will expose their own stupidity, ignorance and the arrogance of pretending to be someone or something which they are not. There are so many charlatans, and the most heinous are politicians.

Why?

They fear exposure and hence the desperate demand that only they can talk on certain issues while the rest of the population is banned and would face persecution by being charged for an offence under the heinous Sedition Laws which have been repealed in many countries, save those countries who are attempting to impose total control.

The biggest hypocrites are the politicians and lawyers still supporting such draconian laws when their mentor, the UK Deep State have retreated on this issue and repealed such laws.

Consider:

In UK, sedition law became obsolete in the 1960s and it was repealed in 2009.

Explaining its reasoning behind the abolition of the law on sedition in 2009, the UK government had argued:

“Sedition and seditious and defamatory libel are arcane offences from a bygone era when freedom of expression wasn’t seen as a right it is today. The existence of these obsolete offences in this country has been used by other countries as justification of other similar laws which has been actively used to suppress political dissent and restrict freedom.”

The UK found the sedition laws “unnecessary” having a chilling effect on freedom of speech. Retaining such a law would send the wrong signals to other countries which actually **used sedition offences as a means to limiting political debate.** And in the US, **the US Supreme Court has guarded zealously the First Amendment, protecting the freedom of speech.**

Back To The Topic

The title of this article is taken from the book “*The Search for Infinity – solving the mysteries of the Universe*” with an Introduction written by Stephen Hawking.

I am now posing a challenge to the Political Harlots, Champions / Defenders all Religious faiths, Intellectual Masturbators, Hypocrite-Lawyers, Fraudulent Reformers etc. (collectively referred hereinafter as “Arseholes”) - that the authors of this book are fraudulent in asserting that INFINITY can be found!

The word “Infinity” means something that is unlimited, endless, without bound, as opposed to “finite”.

So, these scientists are attempting to find something which is “unlimited”, “endless”, “without bounds”? Give me a break!

Even Stephen Hawking, in spite of his haloed stature, confessed in his Introduction and I quote:

*“...It seems that there is a limit we cannot go beyond. A particle with a wavelength shorter than what is called the Plank Length, a millionth of a billion-billion-billionth of a centimetre would have an energy so high that it would form a Black Hole It means that the range of length scale we have to investigate is not quite infinite **Strictly speaking maybe the title should be ‘The Search for the Almost Infinite...**”*

It is clear that arseholes cannot understand simple English! If what is being investigated in “not quite infinite”, then “infinity” cannot be investigated! Hence, even Stephen Hawking advised that the authors changed the title of the book.

Now, do you understand why I have such utter contempt and disgust for such charlatans who says that they are defending God when they know nothing about God.

They do not know or understand:

- Surah 36: Ya Sin (the Heart of the Quran);
- St. Peter Epistle (1) and (2)
- Bhagavad Gita 18:61-62
- The Buddhist Heart Sutra / Mantra

That is why politicians and self-serving lawyers have supported sedition laws. They pretend they are not supporting such legislations, yet they are advocating “amendments” but not the repeal of these archaic and obsolete laws! So, what reforms are we walking about?

Caught them by their b...lls!

Anyone who says that they are defending God, but does not know anything about God.... because God is “Infinite” - are fraudsters and charlatans! They bully and strut like a peacock. **Notice that such charlatans never make an effort to share and explain what they know about their Faith.**

They should be called “**Almost** Genuine Believers”!
