

Whisper's 12th Meditative Insight To The World – The Fallacy of The Perfect Vision

Shared by Matthias Chang

My entire perception of “seeing” was given a new meaning by Whisper this morning.

Whisper said,

“Matthias, you were taught and you believed that the “Perfect Vision” is 20/20. This is erroneous. Research!

Before I continue narrating what Whisper said, I will disclose what I had research below:

Optometrists and ophthalmologists apply the standard for diagnosing the vision status of their patients. 20/20 vision is referred to as the standard and not the perfect vision. It is how a “normal” person sees.

The concept of 20/20 vision (and therefore better than 20/20 vision) started 159 years ago in 1862 when Dr. Herman Snellen from the Netherlands developed his eponymous chart. He finally decided on using letters instead of other symbols.

20/20 vision was just the average, and some people will see better than 20/20 or even better than 20/15 vision on the vision chart – e.g. 20/10.

Continuing with Whisper's insights:

“Matthias, you must “see” beyond the frame of your vision. The window allows you to see but, the views are restricted by the window frames. **If you have a perfect vision, you can see Infinity. But you cannot see Infinity as only HE can see Infinity and no one else!**”

“Space telescopes have created a stir and scientists are beside themselves that what they knew thus far has been wrong. If there are billions of galaxies, it is not possible to “know” anything about the entire cosmos – you or anyone cannot know about Infinity.”

“Yes, science has discovered many things and astounded humanity, but what has been discovered is but a grain of sand. It is utmost arrogance for scientists by the little knowledge that they have, to assert that HE (the creator) does not exist.”

“I have told you many times to “see” with your Heart, not your eyes. When you are meditating, don't you see with your Heart and not your eyes?”

This wondrous experience brings you back to your Mother's womb, when you as an unborn baby, "**saw**" with your Heart and not with your eyes."

"This Gift was lost and now you must, with discipline cultivate and restore the Gift of Sight, with your "Third Eye".

"Isn't it strange that you cannot "see" the "The Third Eye" and over the millenniums you have been told that the "Third Eye is between the brows of your eyes. It is a figure of speech because people will find it hard to accept and believe that the **Heart can "see"**. There is no need to argue or debate. Meditation will end the debate!"

I have made so many mistakes but in reality what I "saw" and attributed my visions to the "Third Eye" is actually my Heart that gave me the visions. If Truth be told, I saw Whisper with my Heart, and I saw beyond with every fibre of my emotions, feelings, love, pure ecstasy!

Beyond words!
