

# Know Geography & Geopolitics – YOU Can Then Expose The Climate Change Scam etc. Guaranteed!

By Matthias Chang – Future Fast-Forward

Yesterday (19<sup>th</sup> June 2024), in my article *“How YOU See The World, Is How YOU Have Been Brainwashed”* I shared with you a secret - that by asking **ONE** simple question, I will know **how a person has been brainwashed!**

**Today, I will use geography to illustrate further the global scam of “Climate Change” so that the Brainwashers cannot keep your “head between your legs” and be blind-sided!**

And don't you dare be a hypocrite and complain about my language and metaphors!

Accept the fact that you have your head between your legs, just as you have now accepted my metaphor “Intellectual Masturbation” (**which I had used for decades**), and which you can **now** find the metaphor even in Google Search, after I had demanded that you search the meaning of the metaphor.

Don't be a hypocrite! Don't! We will now move on.

## Before Climate Change

The term “**global warming**” appears for the first time in print on **August 8, 1975**, in the journal, Science by Wallace Smith Broecker. I will quote from history.com some key words to test you language perception skills:

*Five years earlier, in 1970, Broecker, a researcher at Columbia University's Lamont-Doherty Earth Observatory, published a study of ocean sediment cores that revealed the Ice Age had seen rapid transitions in its climate ..... Broecker built on this discovery in his 1975 paper, which hypothesized that the Ice Age's rapid fluctuations had been caused by changes in "thermohaline circulation": the ocean currents and wind systems that move heat from the equator up north towards the poles and transport cold water toward the equator.*

You can read and read more than five times and you will still not get it! For sure, you cannot. I will make it easy for you so that you can remove your head between your legs! Ouch!

The word is **“hypothesized”** but the study was published in the journal “Science”!

The word **“hypothesize”** is polite Queen's English and a devious method which scientists use to cover-up the fact they are **SPECULATING**. Another meaning for the word is **“Conjecture”**. If the words “speculation or speculating” were used, you will assert that it is not science or scientific, but sophisticated BS! And you are absolutely right!

So, remove your head between your legs!

Google and discover that,

***“To hypothesize means simply to make a hypothesis. Which is just a scientific way of saying “make a really good educated guess.””***

One word, and a wrong interpretation has been implanted in your head!

But, if you are idiotic enough to translate this **ONE** word into e.g. Malay, you will get this **SENTENCE** and not a specific Malay word from the English / Malay Dictionary (I stand to be corrected):

***“membentuk pendapat tanpa mempunyai pengetahuan atau keterangan yang pasti atau lengkap”***

That is why, I forbid anyone from translating my articles **to any language** (Mandarin, Malay, Hindi, etc.) because these wannabes don't have the training and skills to translate and will make a mess of my article. If they don't like it, dump it to the dustbin, but don't ever translate!

## **Some Famous Lies & Failures**

Below are the 50 failed doomsday / eco-pocalyptic predictions.

Written by Steven J. Milloy, titled 'Wrong Again: 50 Years of Failed Eco-pocalyptic Predictions' that covers 50 failed eco-pocalyptic predictions.

1. **1967: Dire Famine Forecast By 1975**
2. **1969: Everyone Will Disappear In a Cloud Of Blue Steam By 1989 (1969)**

**Al Gore** has history of climate predictions, statements proven false. Gore said there was a 75% chance the entire north polar ice cap would likely be gone by 2016. We are in 2024 and polar ice caps are still around. We will quote his nonsense from the article in FOX News,

*“Noted climate activist and former Vice President Al Gore, who made headlines this week after he claimed global warming was "boiling the oceans." has a history of making climate-related proclamations later proven to be false.*

*“During remarks made at the World Economic Forum summit in Davos, Switzerland, Gore warned that continued carbon emissions into the atmosphere would destroy the planet and lead to widespread calamities. 'We're still putting 162 million tons [of greenhouse gas] into it every single day and the accumulated amount is now trapping as much extra heat as would be released by 600,000 Hiroshima-class atomic bombs exploding every single day on the earth,' Gore said. 'That's what's boiling the oceans, creating these atmospheric rivers, and the rain bombs, and sucking the moisture out of the land, and creating the droughts, and melting the ice and raising the sea level, and causing these waves of climate refugees.' .....*”

In a 2007 speech delivered in Norway after receiving a Nobel Peace Prize for his work informing the public about the dangers posed by climate change, Gore noted research that said the Earth's average temperature would increase by "many degrees" if the amount of carbon in the atmosphere doubled.

Scientists, though, have projected the world's temperature to increase by at most 2.9 degrees Celsius above the pre-industrial period by 2100 when the amount of carbon dioxide in the atmosphere is expected to double.

Another lie by Al Gore.

Steve Milloy, a senior legal fellow at the Energy & Environment Legal Institute and publisher of JunkScience.com, told Fox News Digital in an interview,

*"The climate movement's real weakness is that, besides the intellectual bankruptcy of what they're trying to do, is that they're led by these clowns like Al Gore and John Kerry and Joe Biden,"*

*"They say such extreme things — and all the institutions, the government and the media. How do they ever walk any of that back? The answer is they can't. So, they've got to move forward providing cover."*

And Malaysian political leaders and public listed companies (GLCs etc.) are pushing this agenda in Malaysia and following Al Gore, the Pied Piper!

### **The US Environmental Protection Agency – Another Scam**

We need to protect the environment **but not the way** that it has been drilled down our throats. We just echoed the propaganda without examining the science!

Be very angry at the ignorance and how people were misled about the war crimes in Vietnam for which the Vietnamese till today (2024) are still suffering from the effects – death and massive deformation of men, woman and especially children from Agent Orange and the environmental destruction of the entire country. I had been to Vietnam!

#### Vietnam and Agent Orange

##### **Operation Ranch Hand**

During the Vietnam War, the U.S military engaged in an aggressive program of chemical warfare codenamed Operation Ranch Hand. From 1961 to 1971, the U.S. military sprayed a range of herbicides across Vietnam to destroy the forest cover and food crops used by North Vietnamese and Resistance (Viet Cong) troops. U.S. aircraft were deployed to douse roads, rivers, canals, rice paddies and farmland with powerful mixtures of herbicides. During this process, crops and water sources used by the non-combatant native population of South Vietnam were also hit.

In all, American forces used more than 20 million gallons of herbicides in Vietnam, Laos and Cambodia during the years of Operation Ranch Hand. Herbicides were also sprayed from trucks and hand-sprayers around U.S. military bases.

The first batch of herbicides was unloaded at Tan Son Nhut Air Base in South Vietnam, on **January 9, 1962**. U.S. Air Force records show at least **6,542 spraying missions took place over the course of Operation Ranch Hand**.

Agent Orange has also caused enormous environmental damage in Vietnam. Over 3,100,000 ha (7,700,000 acres) or 31,000 km<sup>2</sup> (12,000 sq mi) of forest were defoliated. Defoliants eroded tree cover and seedling forest stock, making

reforestation difficult in numerous areas. Animal species diversity is sharply reduced in contrast with unsprayed areas. The environmental destruction caused by this defoliation has been described by Swedish Prime Minister Olof Palme, lawyers, historians and other academics as an ecocide (source: see End Notes)

The government of Vietnam says that up to four million people in Vietnam were exposed to the defoliant, and as many as three million people have suffered illness because of Agent Orange. An epidemiological study done by the Centers for Disease Control and Prevention showed that there was an increase in the rate of birth defects of the children of military personnel as a result of Agent Orange.

The **Environmental Modification Convention (ENMOD)**, formally the **Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques**, is an international treaty prohibiting the military or other hostile use of environmental modification techniques having widespread, long-lasting or severe effects. It opened for signature on 18 May 1977 in Geneva and entered into force on 5 October 1978. The Convention bans weather warfare, which is the use of weather modification techniques for the purposes of inducing damage or destruction.

The United Nations ratified United Nations General Assembly Resolution 31/72 and the Environmental Modification Convention.

**The hypocrisy of the US war criminals is illustrated by the establishment of the Environmental Protection Agency. Administrator Ruckelshaus was confirmed by the Senate on December 2, 1970, which is the traditional date as the birth of the agency. Five months earlier, in July 1970, President Nixon had signed Reorganization Plan No. 3 calling for the establishment of the EPA.**

Malaysians supported the Vietnam War and were complicit in the war crimes committed there, and our country was used as an R & R centre for the US troops to screw our women. One infamous night club was in Jalan Ipoh, Kuala Lumpur! What a price to pay.

YOU did not know (or adequately know) of this atrocity because your head was between your legs at the material time!

Geographically, Vietnam was too far away. Ditto Gaza is too far away for Malaysians to do anything except to issue some press statements. Why did we not send our military to assist, as the Houthis from Yemen (a small country, much smaller than Malaysia) had done? **No Balls!**

**We are so brainwashed because we know not our geography!**
