

# How To Analyse Intelligence Reports

By Matthias Chang – Future Fast-Forward

On the 4<sup>th</sup> July, 2024, I uploaded a Report, “Peace Through Strength” by Senator Roger Wicker, ranking member of the US Senate Armed Services Committee and sent out to all of you. It was part of my article, “We (Malaysians) Are F\$#@ked! We Don’t Know What We Must Know”.

Criminal scumbags and others were so scared that they hacked my website and removed the specific posting from my website. Do I care? Not one bit!

I am resending again to you for the purposes of this article. See below the attached PDF!

I do not know how many of you have bothered to read the Report. In any event, I know for a fact that 99.8% of you have not read it properly.

- You **did not print** out the Report
- If you have read, you did so from your hand-phone. Idiotic!
- There is **no way** for you to have understood the Report

The predicate of the Report on page 1 itself (the 5<sup>th</sup> page from the Cover page) states in the sub-title that the **2022 National Defence Strategy is already out-dated**.

I quote from the said paragraph,

*“Since the 2022 National Defense Strategy was written, threats have increased across the globe ..... The US National Defense Strategy and the nation’s defense budget that underwrites it have been overtaken by events...”*

It is a **physical impossibility** for you to evaluate this Report and draw certain conclusions, if you **have not read** the 2022 National Defence Strategy and the relevant **budget**.

You have engaged in stupid intellectual masturbation and wasted your time.

The US Deep State is in a state of panic and shock. Understand this mind-set and proceed accordingly as advised.

I quote:

*“A New Axis Of Aggressors: The Most Dangerous Threat Environment Since WWII”.*

Do you agree?

If yes, why?

If not, Why?

All I need to do is to highlight the above comments for you to realise and appreciate that **you do not know what you must know.**

I guarantee that your conclusions are very different from mine in more ways than one.

Read again the PDF below after you have printed out the Report.
