

# The Triangulation Of Power

By Matthias Chang – Future Fast-Forward

This article is structured to provoke you (especially Malaysians) to think and research to get to the core of the onion – to come to grips that we know so little of the real world of politics.

Hence, the Bullet-Point method of writing to stimulate your gullible mind.

- **The Triangle: (1) Global Intel-Apparatus – (2) The Underworld (the Global Mob) – (3) The Global Financial Syndicate.**
- **This Triangulation is fundamental to governmental power. The government is always subservient to the above Triangle of Control. This control is absolute. The government controls nothing!**

## Why?

- The Intel-Apparatus cannot operate without the Mob as the Mob is the source for the extensive tentacles of **“Murder Incorporated”** – the legalised and protected **assassins** and **enforcers**. Soldiers are trained in the military to kill in wars. But the soldiers are not assassins. There is a ‘revolving door’ (two ways) route for this structure.
- The budgets for the Intel Apparatus are never, and cannot be audited, especially covert operations – coups, change of regimes etc. There are always two sets of accounts.
- No President or Prime Minister dare intrude into such areas and their “approvals” for covert operations are convenient covers to provide immunity and non-prosecution under the issue of National Security. No politicians dare question such issues **after** the **disclosure** and **receipt** of information marked **‘Top Secret’** and any ‘leakage’ is subject to long term of imprisonment or ..... If they want power, they obey or else!
- The “Black Economy” is **the substratum** of all global financial system – banks and other financial institutions (especially tax havens). Money-laundering is the undisclosed ‘oil’ that greases the financial machinery at the highest levels. All the laws, statutory disclosures that ‘regulates’ the system is just a cover to promote confidence in the system for the people (sheeple). The ‘selected’ Law firms and Accounting firms are the ‘paid and bought for’ **tools** to facilitate the objectives. They are the corrupt parasites that feed on the system.
- When and if the **flow of funds** from the Black Economy ceases, the financial system would collapse completely. A liquidity crisis. Period!

- **Drugs and Gambling** cannot be outlawed. The Intel-Apparatus and the Mob control this essential feature of a capitalist economy.
- **Politicians are all bought and paid** from the huge 'donations' for elections through various means (legal and illegal), to ensure compliance and the implementation of the agenda. They are all subservient to the Triangle. **The US and UK systems are the models that are replicated throughout the world.**
- The above snapshot is the ultimate '**Public / Private Partnership**'. What cannot be executed or implemented by the public institutions, they are 'privatised' and the previous objections are invariably dismissed or subdued in the **illusion and deception** that under private initiatives the people are not coerced and or compel to accept the hidden controls. The examples are staring at your faces!
- The CEOs and Tycoons **are promoted** under a veneer of respectability and their philanthropy / charity. The conferment of awards and titles are the added gloss to the deception.
- The '**licensing**' of economic activities is a system of the selection of the hired hands (corporations and individuals) and the funding channel in the **Revolving Door Matrix**. There is always the quid pro quo! No free lunches!
- So, do you really think **corruption** can be outlawed and eradicated? BS!
- 98% of the electorate are 'sheeple' and **will comply**. Accept this reality!
- You **have not** given a thought to some of the issues raised in this PDF article.

By all means demonised and or criticise this exercise. I have deliberately excluded my sources to compel you to verify and exercise due diligence. Even, if I had provided the sources in my End-Notes, you would not be bothered to check them out. Too lazy!

**Hint:**

You may want to analyse the 1MDB fiasco, the 1997 / 98 Asian Crisis, the 2007 / 08 Global Financial Crisis, the history of the top ten (10) global banks, who owns the global social media and how the major Intel Agencies were established **before** you embark on your research to challenge me.

Prove me wrong. This is the challenge.
