

The Web That Ensnares Governments

By Matthias Chang – Future Fast-Forward

This is an unprecedented exposé and the reason for the urgent need of protection. You have to do your own research and join the dots. That way you will discover the entire web and no one can say that you are part of a foreign intelligence operation. This exercise is for your own protection. But, only one or two would be bothered, as the rest are too egoistic and in the misplaced hubris that they know everything

Just Names – What is in a name?

It was reported by the MSM even by the NYT.... So, I am serious and you better be ready to protect Malaysia. It may be too late, but you can still save

Let us cut to the Chase.

SolarWinds (SW) – origins ...

Crowd Strike (CS), why it was bought by SW? How is it connected to the DNC and the DNC Russian hoax?

Next, SW bought Samanage (SmG). Why and which country is involved? How is it connected to the Orion software (OS)? Who is Isabel Maxwell?

SW software used in the top ten telecommunications corporations, the top five accounting firms, government contractors, banks such as the then Credit Suisse and the Gates Foundation. In Malaysia, clones hidden by perhaps some local Malay names and they won't be wiser! Sleeping with the enemies!

Who implanted the code that enabled the backdoors? FireEye (FE)??? But now can even be penetrated by remote control. OMG!!!

Why was the CIA a client of FE and where was the funding coming from – maybe from In-Q-tel?

Other connections – Cymore (CyCd) and Ronen Slavin and Unit 8200.

Look out for Chris Krebs and Alex Stamos and connections with Facebook and Yahoo and CISA.

Next, investigate Checkpoint (CP) and CyberArk (CA).

Sunburst and malware Kazuar. The above etc. has nothing to do with Russia but a criminal country in the Middle East and now at war is involved.

Dig Deep into organised crime network as well. Big Hint! Look into the history of PROMIS software (if you have time, but must research later).

Revisit SmG, though based in USA founded by Doron Gordon, worked at MAMRAM ---- Who??? Hint - a country's Central Computing Unit. Where is SmG Research Unit???

Who is SalesForce, the company? Marc Bernioff, the billionaire who started at Oracle, a CIA spin off. How is SalesForce involved with Diagnostic Robotics? Benioff is also a member of the WEF and the Vatican Council of Inclusive Capitalism and with Lynn Forester de Rothschild, the members of the Lauder family (cosmetics) with deep ties with the Mega group. October 2020 WEF Great Reset.

Cybersecurity (with SalesForce) simulated the digital pandemic cyber-attack via Cyber Polygon..... Tony Blair..... Wendy Whitmore (dig deep)

Viola Ventures ... (Ronen Nir – a Lt Colonel in elite Intel Unit) ... VerintCybereason Camel Ventures How is it connected to Jonathan Kolber and the private equity fund Claridge with Stephen Bronfman of the famous Bronfman family.

Gemini Ventures (Ed Mlasky)..... BIRD Foundation Investment in over 300 companies. How did it evolved and invested in CommTouch (now Cyren) and how it is connected to Microsoft via Bill Gates.

Dig deep into the former Attorney-General Bill Barr and what did he covered up?

Finally, Assaf Rappaport, formerly head of Microsoft Research and Development and Security and left just before COVID 19 crisis and set up cybersecurity company, Wiz.

So much more, but this is a start for you.

What's Is Happening?

We are f#@ked in Malaysia, as so many in the industry are blur and or unwittingly seduced by big money (govt. contracts etc.) to contrive and conspire with the above actors and no wiser to the harm they are doing. They will destroy their own community, believing in their own propaganda!

Sad, our Intel Apparatus cannot even state what I want to say!
