

IRREFUTABLE INTEL YOU CANNOT GET - The Real Reason For The Ukraine War!

By Matthias Chang – Future Fast-Forward

So many military analysts got it so wrong (or pretend), when it was staring right in their freaking faces. Malaysian “experts” are clueless and wanking away and getting blisters between their legs!

I was waiting and waiting for the Intel Community in Malaysia to reveal this truth. In the end, I realised they were clueless and in spite of their close proximities with US and UK Intel Apparatus, they were in the dark **because the Western Deep State would not reveal their hidden plans. The over-confidence of our experts also blinded them to the harsh reality and they accepted without more, the propaganda of the Western Intel Community.**

Don't get me wrong, the Intel Apparatus of Malaysia is at the cutting edge but, they are still fighting whatever wars (counter-terrorism etc.) **of the 20th century instead for the 21st century.**

I am a patriot and that is why I am so worried. Knowing and be up to speed means we are and must be prepared for all contingencies. I have done my duty and I am now waking the country to another lie propagated by the West and the reality of the Empire doing whatever it can to maintain the global hegemony.

Yes, the war in Ukraine concerns a vicious war with Russia etc. The strategic concept is **“killing two birds with one stone”** to borrow the cliché – (i) to weaken the Russian military and economy and (ii) to re-invent and transform the US military in all the branches of the military for wars of the 21st century.

It is the massive overall and re-supply of the entire Military-Industrial-Complex.

In Trump's first term as President, Secretary of Defense Jim Mattis drafted a top-secret plan called **“Project Overmatch.” The US military was designed to win wars in the 20th century. But to “Overmatch” and defeat US enemies in the 21st Century, the US needs to have 21st century weapons.**

We quote the then Secretary of Defence, **“We cannot expect success fighting tomorrow's conflicts with yesterday's weapons.”**

The US military would lose easily hundreds of aircraft, almost all surface ships and a minimum of 2 aircraft carriers in the Pacific theatre. US losses would be 20,000 – 30,000 Americans at the minimum. There is no way that such a number of 'killed in action' and or casualties would be accepted by the people. The people would clamour for total militarisation of the country. A 'No-Holds-Barred' victory must be achieved!

The answer in the short term (2-3 years maximum):-

US is unloading and supplying out-dated and ineffective military equipment in the Ukraine war theatre as the only means to get rid of the useless and out-dated military equipment without admitting that they are useless to defeat their peers in the next big war.

The war in Ukraine is a golden opportunity to re-supply and test the weakness of the out-dated equipment etc. supplied to the Ukrainian military army.

That is why Biden, the criminal bastard and bitch Kamala **abandoned all the military equipment worth \$Billions in Afghanistan purely as an excuse and justification.** They were worthless and useless in any major wars of the 21st century. Might as well let the Taliban have the ineffective equipment, though they look menacing from the exterior!

What better way than to dump them in Ukraine and let the Ukrainian army fight the Russians and if the Russians were defeated by out-dated weapon, the US military would be more confident in waging wars against Russia, China, Iran and North Korea, as all past war games have shown that the US Military would be totally defeated in all future wars.

It is not easy for the budget (in the \$trillions) to be approved for “future wars” in peace time, so a **proxy war must be hatched and provoked to re-supply the US and NATO military.**

It is easier to re-supply and modernised the military in the \$ Trillions with the latest and more efficient weaponry for mass killing, to sustain the empire’s hegemony in the provoked war in Ukraine.

The same goes for NATO unloading out-dated equipment in the Ukraine war theatre. That is why and every NATO member has been dumping their supplies with glee because there will be new equipment and a bottomless budget to revive the dead and useless Western economies

The economies of the entire West is war based and the only way to revive the Western economies is to re-supply the military for the future wars of the 21century.

QED!
