

# Trump Won The Unspoken Immigration War – A Bloody, No-Holds-Barred Victory. A Hybrid Malaysian Immigration Template Was Copied And Implemented.

By Matthias Chang – Future Fast-Forward

This is not a thesis, but an “In-Your-Face” exposé on how immigration was exploited to sustain presidential power by the Biden-Harris combo but, countered by Trump to secure an unprecedented Republican Party’s success and a historic second term as a non-consecutive President.

## Revisiting Obama’s Racial Ascendancy

But, for the CIA’s careful selection over a decade to “install” Obama as the US President, there would have been a racial war between the “Black Community” and the “White Community” in the USA. A temporary solution, as if Obama dared to think otherwise and betray the Deep State, there was a “Biden” to take over as the replacement after the liquidation of Obama. **However, Obama proved to be an obedient political dog.**

**8 years of borrowed time was purchased. However, the Obama clown, could not and did not arrest the rapid decline of the EMPIRE!**

The wild card of the suicide poker game was played. Trump fitted the profile but against all odds, he could not be “controlled” as the proverbial puppet. Trump was a billionaire and had his own ideas, inter-alia without the need for wars to be waged to wield power. He lasted for just one term.

## Revisiting - Why Biden?

Biden was willing to wage wars for the Deep State against Russian in Phase 1 and then to pivot to Asia and China in Phase 2.

The presidential election was rigged and master-minded by the Deep State, and Nancy Pelosi in Congress where the “critical votes” were counted, ensured a Biden presidency. VP Pence (a career politician) caved and became part of the conspiracy and betrayed Trump.

Biden fumbled and screwed up big time. However, Biden was able to convince the Deep State that he was even prepared to unleash a nuclear war but a different route must be taken to rig the presidential election and be president again.

**Malaysia’s template on immigration was to be followed, but with a twist as the demographics were different in the USA because:**

- The Empire's economy was in a bloody mess;
- The need for immediate cheap labour;
- It was not feasible for the remaining American industrial might to be "re-located" as the USA industrial might would be hollowed out;
- From 1981 to 2020, China, in leaps and bounds, caught up with the USA in all sectors, even in the conquest of space;
- There was also the urgent need to beefed up the military, as recruitment fell short of all projections;
- The Deep State could not rely on the "Black Under-Class" to fill up the void in the critical sectors as BLM would be the end result;
- More importantly, a humongous propaganda war must be waged to show the world that millions are still desperate enough (and with sufficient incentives) to grovel to the USA, as the ultimate land of "milk and honey"; and
- The USA must win the Culture and Civilisation war!

**Mexico would play the same role as Indonesia did, in the Malaysian Immigration Template in spite of the critical short term and initial hiccups.**

**The price was worth it in all the circumstances. This was agreed!**

The Malaysian experiment was time-tested and proved successful in all sectors in the two decades of implementation.

For the USA, there can be no other choice. Even Trump, the transactional genius that he was, agreed and he was clever and shrewd enough to exploit the immigration issue to ***his advantage***.

To quote Trump, "I want immigrants, but they must be legal." Biden-Harris did not make this distinction and paid a heavy price for this mistake. The majority were "legalised" through US government efforts at ***warp speed, and Trump was identified with this huge effort of legalisation, not stupid Biden.***

Massive "identity tools" were given, even drivers' license when the immigrants have no vehicles! Building the wall at the Southern borders was a distraction because all immigrants **wanted to be legalised** and Trump's call for the legalisation ensured:

- **Industrial and manufacturing employers were on his side, as the issue of cheap labour was resolved;**
- **Since Biden could not cheat by the old method, legalised immigrants becoming voters would be deciding factor and the domestic demographics ensured the legalisation, and voted in sufficient numbers to make the critical difference.**

Need I say more???

Therefore, Trump and the USA owes a debt to the immigration tool and policy of Malaysia, experimented in “government human resource laboratories” for positive national policies.

The desperation of Biden-Harris combo (and the democratic Party) to win at all cost led these idiots to make the gigantic mistake in assuming that it was just a NUMBERS GAME - of counting the immigrants coming into the USA and voting in the presidential election. The domestic demographics knew that it was a NUMBERS GAME, but a legalised Numbers Game. This was ensured by them and they voted for Trump for he was their best bet for immigration.

**Why do you think Trump won in all sectors- an unprecedented landslide victory, even in the proverbial “Seven Swing States”?**

I dared to forecast in 2022 that Trump would win, when f #@ked up political analysts in Malaysia were holding their “dumb-bells” between their legs and speculating.

QED!

PS Why do you think BN has been so successful in the General Elections? There were other factors, but immigrants from Indonesia played a critical role. The quid pro quo was stability and peace. So what did you want?
