

Whisper's 41ST Meditative Insight To The World.

Shared by Matthias Chang

I had received the below miraculous insight a long time ago, not to be shared.

Whisper told me, don't even bother to share, for the people will never practice this insight and be appreciative. After long persistence, I obtained her permission to share this miracle.

Whisper said,

"At your insistence, we allow you to share the miracle, imparted to you a long time ago and it **took you years of practice**, yet you have not reached the heights of "**seeing**" the **LIGHT**. You insist and insist, a glutton for punishment."

"This is the only exception to the rule! You will regret the sharing of this miracle. You are not being selfish for not sharing as demanded by us."

"But, since you insist and that is the only way you will learn and discover, we have made this **one exception**. You have helped so many people, without any expectation of appreciation and gratitude, but how many have turned their backs on you when you tested them, again and again? **Not even the number of fingers of one hand. It is that few!**"

"It is so ingrained in the culture and or habit of humanity, that and in spite of the Sun and its reflected glow, the Moon, you and your people resorted to artificial light whenever in the dark, not just during night time."

"Even enlightened Gurus from all Faiths, are so afraid of the Dark. How people forget that in the beginning of creation, **ALL WAS DARK**, and **then, there was Light!**"

"Think and meditate on the Understanding and Gift that in darkness we see all things, for even in darkness, nothing can be hidden - Nothing can be hidden!"

"Humanity lost the Gift of Sight in darkness. When the Sun "**SETS**" to use the silly expression in your language, there was "darkness" and your people sought the reflected glow of the Moon. Yet, the light of the Moon and the Stars were never bright enough for the people to "**see**" in the dark."

"Artificial light took over and in time of darkness even during the day, your people had to switch on the artificial light to see."

“Recall the times, when we taught you how to “see” in darkness. You saw and were permitted to see things in the dark. There was no need, as some are required to do, to enter a cave or a room in total darkness to acquire the wisdom and discipline to “see” in total darkness. **Yet, the visions seen with the naked eye in darkness were clearer and sharper than the visions perceived in the total glare of the Sun or artificial light.”**

“Forget what the ‘blinded’ scientists teach you about ‘Black-Holes’ at the time of creation. Can you not see the inherent contradiction? If in the beginning, there was darkness, the issue of ‘Black-Holes’ is utter nonsense. It is worse than voodoo science. It is fraud at the intellectual level.”

“Research from any source and you will discover that a common understanding or expression that captures the idea - before light there was darkness or darkness precedes the dawn, hence, before the light of a new day arrives there is always the darkness of night.”

“Since your people are so lazy, maybe you ought to assist them with some quotations on darkness. This is the lazy way of spoon feeding them and even such an effort is wasted. Take heed, you will regret your insistence of sharing.”

With this warning Whisper departed, somewhat disgusted with my lack of FAITH in her messages.

Yes. I instantly REGRETTED my insistence!

Therefore, I am writing this message to tell you that I regretted my insistence and my lack of faith in Whisper.

Never again will I disobey the sharing of insights which Whisper has forbidden to be shared with anyone!

Some quotations that I found, as instructed by Whisper - it is really a waste of my time!

1. “The dark and the light, they exist side by side. Sometimes over-lapping, one explaining the other. The darkened path is as illuminated as the lightened...” – Raven Davies
2. “Faith is the bird that feels the light when the dawn is still dark.” – Rabindranath Tagore
3. “Hope is being able to see that there is light despite all of the darkness.” – Desmond Tutu

4. "However vast the darkness, we must supply our own light." – Stanley Kubrick
5. "A visionary is one who can find his way by moonlight and see the dawn before the rest of the world." – Oscar Wilde
6. "The darkness around us might somewhat light up if we would first practice using the light we have in the place we are." – Henry S. Haskins
7. "Maybe you have to know the darkness before you can appreciate the light." – Madeline L'Engle
8. "In the midst of darkness, light persists." – Mahatma Gandhi
9. "It is often in the darkest skies that we see the brightest stars." – Richard Evans
10. "We can easily forgive a child who is afraid of the dark; the real tragedy of life is when men are afraid of the light." – Plato
11. "What makes night within us leave stars." – Victor Hugo
12. "Look at how a single candle can both defy and define the darkness." – Anne Frank
13. "I will love the light for it shows me the way, yet I will endure the darkness because it shows me the stars." – Og Mandino
14. "Every moment of light and dark is a miracle." – Walt Whitman
15. "Life isn't just about darkness or light, rather it's about finding light within the darkness." – Landon Parham
