

# The Freaking World Is Big Enough For USA, Russia and China. USA Is The Worst Enemy of the British Empire. Why?

By Matthias Chang – Future Fast-Forward

I have said repeatedly that the Big Three Powers must sit at the Geopolitical Table with the assistance from regional powers to establish a long lasting and genuine peace.

## A Reminder

**The USA is so self-centred, brainwashed and arrogant that the Americans till today have yet to appreciate that most hated country in the world to the British Empire is the USA, not freaking Russia or China. Get that registered in your heads!**

**The modus operandi of the British Empire is to exhaust her enemies by provoking them to wage wars on her behalf and then destroy them from within. That was how the British Empire destroyed France.**

By all means read about Sir Halford John Mackinder, the British geographer, academic and politician, who is regarded as one of the founding fathers of both geopolitics and geo-strategy. He brainwashed colonial idiots who studied political science, that any power that could control the “heartland” would have the ability to project influence over Europe, Asia, and Africa, effectively controlling the world. Likewise, read Zbigniew Brzezinski, a Polish-American mouthpiece who served Lyndon B. Johnson from 1966 to 1968 and was Jimmy Carter's National Security Advisor from 1977 to 1981 and wrote the book, “Grand Chessboard” etc. But, don't get brainwashed by their subservience to all things, British Empire.

## Toilet Paper Money

The US\$ Toilet Paper Money is the greatest scam in financial history. The US\$ is the biggest export for the USA. The Euro € is the biggest export for the EU. Yet, we know so little about money, banking and the financial scam.

Nick Giamb Bruno recently wrote that,

***Henry Ford once astutely observed that a revolution would occur overnight if people truly understood the banking and monetary system. That's because modern banking is an elaborate illusion—one that lulls people into a false sense of security... until it's too late. Large banks can fail within hours, and life savings can vanish overnight. The US banking system is particularly vulnerable. So, why do so many people place their confidence—and life savings—into such a fragile system? It's because they don't understand three fundamental truths about modern banking:***

- #1. The money isn't yours.
- #2. The money isn't actually there.
- #3. The money isn't really money.

*Many people are shocked to learn they don't actually own the money in their bank accounts. Once you deposit money, it's no longer your personal property — it legally belongs to the bank. And they can do whatever they want with it. What you do own is simply a promise from the bank — an IOU — to pay you back. The money you think is in your bank account ... doesn't actually exist. Banks don't keep physical cash in vaults for each depositor. They don't even hold enough digital funds to cover a small fraction of withdrawals. In fact, during the COVID mass psychosis, the US government removed reserve requirements — meaning banks no longer need to keep any funds on hand for withdrawals. So, where does all the money go? Behind the scenes, banks use "your" money to place risky bets on speculative investments. They're gambling with your life savings — often recklessly. It closely resembles a Ponzi scheme—one that depends entirely on the illusion that everyone's money is available, when it's not.*

Did you know that the **total value** of the global stock market, as of the **end of 2023**, was approximately **US \$111Trillion** - this figure represents the **total market capitalization** of all publicly traded stocks worldwide.

\*\*\*\*\* However, and according to the Bank for International Settlements (**BIS**) **Triennial Central Bank Survey**, **the DAILY\*\*\* global Forex trading volume reached a record USD 7.5 trillion**, up from USD 6.6 trillion in 2019, driven by increased cross-border trade and investment flows.

The \$7.5 trillion **DAILY** break-down is as follows:

- \$2.1 trillion in [spot](#) transactions
- \$1.2 trillion in [outright forwards](#)
- \$3.8 trillion in [foreign exchange swaps](#) \*\*\*
- \$124 billion [currency swaps](#)
- \$304 billion in [options](#) and other products

Measured by value, **foreign exchange swaps** were traded more than any other instrument.

**Arseholes - FOREX TRADING is CURRENCY TRADING! Yet, this fact is not captured in the fraudulent computation of US Trade deficit!**

**Trump and no one else would dare levy a tariff on the trade of currencies.**

**In reality, there is always a surplus – US\$ and the US debt is a scam because it will never get paid. US Debt papers are always exchanged for US Toilet Paper Money in the financial Merry-Go-Round.**

**So, what is it that you do not and or cannot understand this simple and basic fact?**

The US\$ is the “supreme” currency – the **EXORBITANT PRIVILEGE** that enables the **ELITE GRINGOS** to live a life of luxury and for the **American Middle-Class** and the **Working Class**, decades of “easy living” in the USA when compared to the rest of the world! It is all coming to an end and the Americans are pissed off but, have the audacity to blame China and the Global South for their self-created fuck ups!

The global de-dollarization is gaining momentum because the **global working class** is freaking out that their fucked up political leaders have been so corrupt, and devious. They were misled for decades (even after Independence) – political leaders selling out to the West.

Every government leader and their cronies are panicking, fearful that their days in power are numbered. What excuses can they give to justify the lies and deceit?

They can only divert the attention to non-issues (e.g. tariffs) and or lay the blame on other countries, such as China, the genocide in Gaza and the threat of nuclear war against Iran.

**For the global scumbag political leaders, they will blame the USA and Trump. In reality, they are from the same Mafia political gang.**
