

Whisper's 51st Meditative Insights To The World

Shared by Matthias Chang

When does time intersects with eternity?

Eternity = Infinity

Time = HIS time or your time?

A Point in Time = is there a Convergence of Time?

Whisper stayed away at a distance as if avoiding me.

Whisper said.

“Matthias, there is so much toxicity in your ‘reality’ and soon the convergence of time will determine the survivability of humanity. I have told you to peel the layers of time as you would an onion. There is so much intellectual garbage that your people are ‘missing the forest for the trees’ and missing the big picture.”

“The intellectual gurus describe the state of affairs of your world and confuse all of you by their so-called expertise and by manipulation force you to accept their opinions as ‘Gospel Truth,’ and demand that you surrender to the dictates of the **‘Intellectual Priesthood’** and kow-tow in abject subservience to their authority.”

“99.9 per cent of people will not be able to fathom the meaning, when ‘time intersects with eternity’ save the chosen and the enlightened and you are not included. You have not willed your heart to see beyond your time, groping in the dark for answers.”

“There seems to be an irreconcilable contradiction that time can intersect with eternity. The language and words cannot penetrate the ‘hidden’ meaning when the key to open the doors of understanding is the **unique spiritual experience of ‘living’ in HIS time.**”

“I will leave you with this message. It is utter stupidity and arrogance to accept the speculative theory, as the absolute truth, that CREATION started with a “Big Bang” at a point in time billion of light years ago!”

“A Pure Speculation promoted and ‘scientifically proven’ as the absolute and inerrant truth.”
