

Nixon's 1971 Move Crushed Your Paycheck

Dear Reader,

The numbers don't lie. They scream!

Labour got screwed. Big time!.

**In 1970, workers took home 51% of America's income. By 2022? Just 43%!
That's not a dip. It's theft.**

\$149 trillion stolen from workers over 52 years. Think about that. \$22,000 per worker per year. Gone.

- **The Great Wage Heist:** Workers lost \$149 trillion over 52 years as their share of national income dropped from 51% to 43%—that's \$22,000 stolen from each worker annually
- **Nixon's Golden Betrayal:** The 1971 end of the gold standard unleashed money printing and globalization, flooding America with cheap foreign labour that crushed domestic wages forever

Real estate investing is more treacherous than ever.

Nixon killed the gold standard in 1971. Game over for American workers.

**We started printing paper. Sending it overseas. Getting real goods back.
Genius move for Wall Street. Disaster for Main Street**

China flooded the market with cheap labour. American wages never recovered.

Now they tell us robots will save us. Sure they will. These same robots that'll replace every job? They're our salvation? I've seen this movie. The rich get richer. The poor get poorer.

Technology doesn't trickle down. It floods up. Where it always goes to the top.

Workers built America. Now America forgets its workers. That's not capitalism. That's crony capitalism.

Labour Day Truth

We celebrate Labour Day. But what are we celebrating?

**Poor dad worked hard his whole life. Got a paycheck. Paid taxes.
Followed the rules. Rich dad owned assets. Made money work for him.**

The system rewards rich dad. Punishes poor dad. That's the game.

To every construction worker pouring concrete in 100-degree heat. I see you

To every nurse pulling double shifts. I see you.

To every teacher spending their own money on supplies. I see you.

To every factory worker whose plant moved to Mexico. I see you.

You're not lazy. You're not stupid. You're playing by rules that changed without telling you.

The old rules said work hard. Get ahead. The new rules say own assets. Make money while you sleep.

Labour Day should celebrate this truth: Your labour built every skyscraper. Every bridge. Every road.

But who owns them? Not you!.

You trade time for money. The rich trade money for time.

Time wins. Every time!

Kiyosaki's Wisdom
