

US Educational System Has Screwed American Children By Massive Drug Addiction.

Extracted from the Report of Sister Ciara

United States Supreme Court Justice Neil Gorsuch warned last week: “*This is one thing my colleagues and I really agree on: the importance of bringing civic education to our children...Half of Americans cannot pass the citizenship test that non-Americans who are seeking to become U.S. citizens are expected to pass...Most Americans cannot name the three branches of government...And if you ask me what the greatest danger America faces today, it’s itself*”.

As to why the **American** educational system has become a wasteland, the **Wall Street Journal** article “*Millions of Kids Are On ADHD Pills. For Many, It’s The Start Of A Drug Cascade*.”

While **Russia** emulates what the **United States** did a century ago to educate schoolchildren into being patriotic and knowledgeable citizens able to protect their country, **America** has become an “*educational wasteland*” whose *oversupply of college educated idiots are unemployable*—these unemployable college grads *blame capitalism and are now turning to communism*—and while **Ford** *can’t find mechanics to fix their vehicles people buy*, major companies like **Palantir** are *hiring high school students because college graduates are a waste*.

Russia has created the strongest military in the world by using the education of its schoolchildren is exactly what the **United States** used to do, who created the *Boy Scouts of America* in **1910** to teach young schoolchildren about flag-raising, loyalty, obedience, and instill in them readiness to fight to protect their country.

President **Woodrow Wilson**, in **1916**, *formally established* the **Reserve Officer Training Corps** (ROTC) to train high school students in army discipline, military history and teach them how to assemble weapons—and when **World War II** crashed into **America** in **1941**, history recorded: “*Nationally, ROTC provided some 100,000 officers to the army, far outnumbering the 14,000 Regular Army officers then serving*”.
